TWENTY-SEVENTH REPORT

OF THE

DERBYSHIRE

County Pauper Lunatic Asylum,

FOR THE YEAR 1878.

COMMITTEE OF VISITORS.

Lieut.-Col. MOSLEY, Burnaston House, Derby (Chairman).
T. W. EVANS, Esq., M.P., Allestree Hall, Derby.
CHAS. EDMUND NEWTON, Esq., Mickleover, Derby.
N. C. CURZON, Esq., Lockington Hall, Derby.
Lieut.-Col. NEWDIGATE, West Hallam, Derby.
Sir H. F. EVERY, Bart., Egginton Hall, Burton-on-Trent.
W. EVANS, Esq., Darley Abbey, Derby.
G. F. MEYNELL, Esq., Meynell Langley, Derby.
E. SUTTON, Esq., Shardlow Hall, Derby.
A. F. HURT, Esq., The Outwoods, Derby.

TREASURER	GEORGE CROMPTON, ESQ.
SUPERINTENDENT PHYSICIAN	J. MURRAY LINDSAY, M.D., F.R.C.S.E., L.S.A.
HON. CONSULTING PHYSICIAN	J. HITCHMAN, M.D., F.R.C.P.
ASSISTANT MEDICAL OFFICER	D. G. THOMSON, M.B., C.M.
CHAPLAIN	THE REV. WM. FINDLEY.
CLERK AND STEWARD	MR. JOHN LANGLEY.
HOUSEKEEPER	MISS MARTIN.
CHIEF ATTENDANT	MR. JOHN ELLIOTT.
CHIEF NURSE	MISS WOODWARD.

B. SCOTT CURREY,
CLERK TO THE COMMITTEE.

Report of the Visiting Committee.

Your Committee beg to present the Superintending Physician's Annual Report, with Statistical Tables annexed, and detailed accounts of Receipts and Expenditure for the past year.

The conduct and arrangements of the Asylum, under the direction of Dr. Lindsay and the other officials, have been perfectly satisfactory. No additions, alterations, or improvements exceeding in amount £100, other than such as have received the sanction of Quarter Sessions, have been made or ordered.

(Signed) ASHTON MOSLEY,

CHAIRMAN.

Report of the Commissioners in Lunacy.

DERBY COUNTY ASYLUM,

Nov. 14th, 1878.

We have just concluded an inspection of this Asylum, which was last visited by Members of our Board on Sept. 26th, 1877. We find that proceedings for a Union under the Lunacy Acts of the County and Borough of Derby have now progressed as far as settling the terms of agreement in that behalf between the Committee of Visitors and a Committee appointed by the Council of the Borough. The plans for the enlargement of the Asylum in view to that union having been submitted to our Board, will be forwarded for the approval of the Secretary of State so soon as the union shall have been accomplished. The Asylum still exhibits good management, and Dr. Lindsay appears to be as anxious as ever for the welfare of his Patients, who now number 428, of whom three Men and five Women are away on leave. The Males are 205, the Females 223, all of each sex being Paupers, chargeable as follows :— 169 Men and 196 Women to the County of Derby and Unions in the County ; 36 Men and 24 Women to the Borough of Derby ; three Females to out-counties. The weekly rate of maintenance for the first mentioned class is 11s. As usual, we required every Patient to be shown to us (excepting, of course, those on leave), and with a considerable number we exchanged a few words, affording full opportunity of complaint to all. The only Patient who complained of ill-treatment by an Attendent was a Woman ; the Attendant long ago left the Asylum, and the Patient's statements were on the face of them highly exaggerated, and contradicted by the Medical Superintendent, to some extent ; she is herself clearly

disposed to violence, and her testimony was corroborated by no one else. The dietary has undergone no change, and it appears to give general satisfaction. The personal cleanliness and neatness of attire of both sexes were very creditable to those who have to do directly with the Patients; and the conduct of the insane during our visit to the Wards, was quiet and orderly throughout the building. The staff of Attendants now consist of 15 Men and a Woman on the Male side, and of 19 Nurses for the Female Patients during the day. At night, two Attendants of each sex are on duty. Three Men, but as many as 15 Women are the Attendants who cannot count more than twelve months' service. No Attendant is engaged under 20 years of age. The wages of the staff have been raised somewhat since the Commissioners were last here. As to the employment, amusement, and exercise of the Patients, we have examined the Ward Reports, and made enquiry of Dr. Lindsay, and learn that these important matters are by no means overlooked; but as to the exercise of the Patients by walks in the grounds, we think that it should be daily, weather permitting, and include as many as possible. Strenuous efforts should be made to overcome difficulties in this direction. The attendance on last Sunday at Chapel was, we are told, 105 Male, and 107 Female Patients; the Roman Catholics here are very few indeed. The cases admitted since Sept. 26th, 1877, have been 200; of these, 121 were on the Men's side, and 79 on the Women's; 74 Males and 51 Females have been discharged: of the former 43, of the latter 38, had recovered; those discharged include 17 Men transferred to Workhouses, and 7 Men and 9 Women placed in the care of their friends. As many as 52 of the Male and 30 of the Female sex have died. The Mortality has indeed been very high, having been at the rate of 16 per cent. per annum on the average daily number resident—that is to say, 6 per cent. above the usual rate in County Asylums. On reference to the Records, and as the result of inquiries of Dr. Lindsay, we can state that a large proportion of the Patients received during the last 14 months were in bad bodily health at admission. The deaths from General Paralysis and Pulmonary

Consumption have been unusually large, but no contagious or infectious disorder has occurred. The following table sets forth the assigned causes of death verified by *post-mortem* examination in 71 out of 82 instances :—

	Males.	Females.	Total.
General Paralysis	17	2	19
Epilepsy	3	4	7
Other forms of Brain Disease including those ending in ordinary Paralysis and Apoplexy	8	6	14
Exhaustion after Mania and Melancholia	4	3	7
Pulmonary Consumption	9	5	14
Other forms of Lung Disease	3	4	7
Disease of the Heart	4	4	8
Disease of Abdominal Organs	2	2	4
Strangulated Hernia	1	0	1
Fractured Ribs	1	0	1
	52	30	82

Coroner's Inquests were held in five cases.

No. 1.—Upon a Woman who died suddenly of Apoplexy.

No. 2.—Upon a Woman who died of Epilepsy; no Attendant present.

No. 3.—Upon a Man who died suddenly of Heart and Lung Disease.

No. 4.—Upon a Man who died of Pleurisy. He had a rib broken several weeks before his death, but that fracture was not the cause of the Pleurisy. As far as we can gather, the fracture resulted from his having been thrown against a table by another Patient.

No. 5.—Upon a Man who died from Fractured Ribs, the injuries having been inflicted by another Patient, against whom a verdict of Manslaughter has been returned by a Coroner's Jury.

Particulars of these five cases have been sent to our Board. With reference to the last above mentioned, we have to-day ourselves made inquiry. The alleged assailant is a man of violent disposition, and so insane as to be unable to give a coherent answer to any question. The assault was seen by one person only, an Attendant. According to his statement, it took place early in the morning, in a single room, and he immediately interfered and removed the aggressor. Three Attendants are attached to the Ward, which is occupied by 30 Patients, most of whom were at the time in the act of dressing. One Attendant was at a Lavatory in a distant part of the Ward, another was gone to the Laundry with foul linen. The Patient charged with the assault, and now committed by the Coroner for trial at the Assizes, is still here, but we are assured that he is specially watched. To-day he was in bed suffering from Bronchitis. There remains a large proportion of Patients in feeble health. The Epileptics are about 40 of each sex, but the general Paralytics have been reduced by recent deaths to 9 Men and 3 Women. The cases in bed to-day were 6 in the Male, and 4 in the Female Division. The Patients registered as under medical treatment are 20 Men and 23 Women. We saw one Patient only visibly bruised, and he was an Epileptic, who had provoked the attack of another Male Patient. In the Casualty Book there is a full record of bruises and injuries to Patients. From the Medical Journal it seems that there has been no resort to mechanical restraint or seclusion since the last visit. We found the Wards and Dormitories throughout the Asylum very clean and in the best order, and cheerfulness and comfort prevailed; but there was a foul smell in No. 8 Female Bath Room, for which an immediate remedy is required. Higher fenders are also necessary, we are of opinion, in some Wards, which Epileptics occupy.

Improvements continue from time to time to be introduced, and amongst them we noticed specially the Padding of many Seats in both Divisions, the supply of Linoleum in two Wards, the construction of additional Water Closets and Lavatories, the conversion of some Old Offices into Dormitories, the gradual substitution of Modern for Antiquated Crib Bedsteads, the External Ventilation of all Water Closets not previously provided with that arrangement, and a considerable addition of Books for Reading in the Wards. We have much satisfaction in reporting that the purchase of 16 Acres of Land, contemplated and referred to in September, 1877, has since been completed.

The Committee have, we are also glad to learn, shown their appreciation of the value of Dr. Lindsay's services by recently making a substantial addition to his salary.

SIGNED, { CHARLES PALMER PHILLIPS, JOHN D. CLEATON, } Commissioners in Lunacy.

To the Committee of Visitors of the Derby County Asylum.

GENTLEMEN—

I beg to submit the TWENTY-SEVENTH REPORT of the Asylum, for the year 1878.

On the 31st December, 1877, the Asylum contained 428 Patients. The Admissions during the year have been 175, the Discharges have been 110, and the Deaths have been 71, leaving 422 Patients in the Asylum at the close of the year, which shows a decrease of 6 upon the number remaining at the end of the previous year.

Of the 422 Patients remaining in the Asylum on 31st December, 1878, 360 (170 Males and 190 Females) belong to the County, showing a decrease of 19 upon the number of Derbyshire Patients remaining at the close of the previous year, due to the greater number of discharges and deaths. 58 Patients (34 Males and 24 Females) belong to the Borough of Derby, being an increase of 21 upon the number of Borough Patients remaining at the end of the previous year; and 4 (1 Male and 3 Females) are Out-County Patients. There are no Private Patients.

Comparing the Admissions of the last two years we find—

(1) Of the Admissions during the past year 126 (76 Males and 50 Females) were from the County, compared with 121 in 1877, which shows an increase of 5 in the number of Derbyshire admissions.

(2) 49 Patients (30 Males and 19 Females) were admitted from the Borough of Derby, compared with 45 in 1877, being an increase of 4, which shows that this Institution continues to be made available for the reception of the large majority of occurring cases of insanity in the Borough.

(3) No Out-County Patients have been admitted during the past year. In 1877 there were 9 Out-County admissions.

(4) No Private Patients were admitted during the past year, for the reasons stated in last year's Report.

At the close of the year the total accommodation (including a Temporary Dormitory for 10 Male Patients) amounted to 443 Beds, 211 in Male and 232 in Female Division, of which number 21 were vacant beds, 6 in Male and 15 in Female Division.

Of the 422 Patients remaining in the Asylum at the close of the year, not more than 44 (24 Males and 20 Females), or 10·42 per cent., are deemed curable, this number including a considerable proportion of relapsed and doubtful cases. This proportion is higher than the previous year, which was 6·77 per cent., and is due to the wider margin allowed for relapsed and doubtful cases.

The total number under care during the year has been 603, showing an increase of 19 as compared with 1877, whilst the daily average number resident has been 422, being a decrease of 3 upon that of the previous year.

Admissions.—The Admissions of the past year have been 175, exactly the same as the previous year, the disproportion between the sexes being also the same, viz., 106 Males to 69 Females.

Amongst the Admissions there were many Epileptics (of whom we have a large proportion in this Asylum, about one-fifth of the

total number of Patients), and some senile dements who might have been taken care of elsewhere than in the County Asylum, and some of whom only go to swell the mortality rate. There were also two Idiot children, a boy 6 years of age, and a girl 8 years of age, for whom a Lunatic Asylum is not the best place. It is to be hoped that in any fresh Lunacy Legislation some suitable provision will be made for the proper care and training of Idiot children in special institutions.

The Commissioners in Lunacy, in their Tenth Report to the Lord Chancellor, refer to this subject, and state: "It has long been "our opinion as the result of extended experience and observation, "that the association of Idiot children with Lunatics is very objec- "tionable and injurious to them, and upon our visits to County "Asylums we have frequently suggested arrangements for their "separate treatment and instruction. It is always to us a painful "thing to see Idiot children, whose mental faculties and physical "powers and habits are capable of much development and improve- "ment—wandering, without object or special care, about the Wards "of a Lunatic Asylum."

With reference to the principal causes of Insanity in those admitted, Table X. will show that hereditary predisposition was ascertained in 25 per cent., being 9 per cent. higher than the previous year; intemperance was assigned as the cause in 16 per cent., being 2 per cent. higher than the previous year.

Discharges.—110 Patients were Discharged, of whom 71 were Recovered; and 39 were Discharged to the care of their friends, to other Asylums, and to Workhouses, or otherwise. During the past, as in the previous year, the Committee have readily facilitated the discharge of suitable cases, although not recovered, to the care of their friends; and in order to relieve the pressure for room on the

Male side, many Chronic and Imbecile Patients have been removed to Workhouses or to other Asylums.

The Recoveries (exclusive of those discharged relieved) are at the rate of 40.57 per cent. on the Admissions (35.84 per cent. for Men, and 47.82 per cent. for Women), which is 4 per cent. higher than our recovery rate of the previous year, and 10 per cent. higher than the average recovery rate in County and Borough Asylums for the year 1877, which was 30.07 per cent., as given in the last published Report of the Commissioners in Lunacy.

Deaths.—The Deaths amount to 71, being at the rate of 16.82 per cent., on the daily average number resident, and 11.77 per cent. on the total number under treatment.

The Mortality of the past year has been high, over 2 per cent. higher than in 1877.

The high mortality is due to the bad state of health of many of the Patients admitted, nearly a third of the Deaths having occurred amongst the Admissions of the year, and to the considerable proportion of Deaths amongst the aged inmates, nearly a third of the total number who died having been upwards of 60 years of age.

The chief causes of Death were Pulmonary Consumption and General Paralysis, which together account for nearly half the total number of deaths. Of those who died of Pulmonary Consumption at least 11 had the seeds of that disease on admission, and only lived a few months, or succumbed within 12 months after admission.

The average age at Death was 49 years. Four Inquests were held during the year; one died suddenly from Epilepsy, another from Heart Disease and Broncho-Pneumonia, a third from Pleurisy

with Effusion and Phthisis, and in the case of the fourth, Francis S. Bamkin, death was due to Shock from Fractured Ribs and Broncho-Pneumonia, the result of injuries inflicted by another Patient, John Siddall, against whom a verdict of Manslaughter was returned, and who now awaits his trial at the next Assizes.

During the past year, Deputations from two Boards of Guardians, Shardlow (on two occasions in January and November) and Hayfield, visited the Patients chargeable to their Unions in the Asylum.

By the death on 1st October of Mrs. Jane Green, late Head-Laundress, a Pension of £24 per annum has lapsed, having been granted on 29th June, 1875.

A birth took place, a Patient, a married woman, gave birth to a son on 31st March. The child was subsequently removed by the father.

The Committee of Visitors, at their meeting on 1st June, empowered their Medical Superintendent, at his discretion, to grant temporary leave of absence to any Patient for whom he may think it advisable, for any period not exceeding 14 days. This authority, which is a very useful auxiliary to treatment, has enabled the Medical Superintendent to grant temporary leave for various periods of a day or two to a week to several Patients, who have derived great benefit and pleasure from visiting their friends.

During the past year an important alteration has been effected with regard to the Workmen, a Regular Staff of Workmen having been engaged, consisting of Joiner, Bricklayer, Smith, and Labourer, who have no outside work or other jobs, and whose whole time is given to the Asylum. There can be no doubt that this arrangement is much more satisfactory, and more economical than formerly.

The new arrangement for the Workmen took effect on 2nd September.

Some changes have taken place in the Staff during the past year, vacancies having occurred in the offices of Chief Nurse, Assistant Medical Officer, and Engineer.

Miss Woodward entered on duty as Chief Nurse on 18th June.

Dr. D. S. Thomson entered as Assistant Medical Officer on 2nd August.

Mr. George D. Dennis entered on duty as Resident Engineer on 3rd September. During the short time he has held office, his duties have been performed satisfactorily; he has shown great interest in his work, and has been very attentive in supervising and instructing the workmen who are under his direction.

The protracted negotiations for the Union of the County and Borough for Asylum purposes were broken off by the refusal of the Town Council, on 5th December, to ratify the agreement, the terms of which had been settled and accepted by the Committee of Visitors of the County Asylum and the Committee appointed by the Town Council.

The occupations and recreations of the Patients have received attention as heretofore.

The question of providing more commodious and better Workshops, as recommended by the Lunacy Commissioners, has been under the consideration of the Committee during the past year. In order to promote the occupation of the Patients, and to provide

better Workshops, the Workshop accommodation being very inadequate, the Committee have instructed Mr. Martin to prepare Plans of new Workshops, to be submitted for the approval and sanction of Quarter Sessions in April next.

The question of the removal of the Gas Works, which are defective, from their present objectionable position, as strongly recommended by the Lunacy Commissioners, has also been under the consideration of the Committee from time to time. The Committee have now instructed Mr. Martin to prepare Plans of new Gas Works, to be erected at some considerable distance from the main building. These Plans will also be submitted for the approval and sanction of Quarter Sessions in April next.

The Patients' Entertainments have been varied. There have been six Musical and Theatrical Entertainments by the Asylum Staff, five Cricket Matches with Neighbouring Clubs, the Asylum having gained four out of the five matches, besides Conjuring and other Entertainments.

I have pleasure in acknowledging with thanks several excellent Concerts kindly and gratuitously given by the Green Hill Wesleyan Choir; the Derby Orchestral Band (on three occasions); Derby Amateurs; and an interesting exhibition of Dissolving Views, shown by the Oxy-hydrogen Lime Light, kindly given by Mr. J. Roberts, of Derby.

One of the Musical Treats of the year was a Concert given by Rowland Cotton, Esq., Etwall Hall, and Friends, to whom we are greatly indebted for so kindly entertaining the Patients.

On 20th June a party of Patients had their annual Pic-nic to Matlock, which they greatly enjoyed, as usual.

With the sum of £5, granted by the Committee, 61 Volumes have been purchased for the Asylum Library. In addition, a friend

has presented 20 Volumes of the *Cornhill Magazine* to the Asylum Library.

Amongst the additions, alterations, and improvements effected, in progress, or decided upon, may be mentioned—

(1.) Small Gas Stoves have been fixed in all the Wards for the use of the Attendants, so as to economise fuel during the summer months.

(2.) A "Wing Guard" has been placed on top of Smoke Shaft on Female side. The work was carried out by the Asylum Staff of Workmen, under the direction of the Engineer, by which arrangement a considerable Saving to the County was effected, compared with what the cost would have been as per Tender sent in.

(3.) Asphalting Paths of North Male Airing Court.

(4.) Cushions covered with American Cloth have been supplied to all the Forms and Seats in the Female Wards, as in Male division.

(5.) Gradual abolition of old Crib Bedsteads, and substitution of Wire Spring Bedsteads for the Infirmary Wards.

(6.) The addition of a Bath-room in No. 3 Female Ward—the Infirmary—by the conversion of a Single Room, as in the Male Infirmary.

(7.) Additional Water Closets in Female Wards 3 and 4, by the conversion of two Single Rooms into four w.c.'s, as in the corresponding Wards on the Male side.

(8.) Altering and improving the defective state of the floors of the Bath-rooms and Lavatories in Female Wards 7 and 8, by filling up with Concrete, and substituting Tiles for Boarded floors.

(9.) Additions and alterations to Kitchen, Laundry, and Water Supply, for which the Court of Quarter Sessions has given a grant, and the plans of which have been sanctioned by the Lunacy Commissioners and the Home Secretary. These works will be commenced in Spring.

On 14th November the Asylum was visited by two of the Commissioners in Lunacy. All their suggestions have received attention. Copy of the Report of their statutory visit is appended.

I have great pleasure in acknowledging the willing and able assistance I at all times receive from Mr. Langley, the Steward, in the economical working of the establishment. The Farm continues to be not only a means of healthful, curative, and useful occupation to the Patients, which is the primary object, but under Mr. Langley's successful management is also a source of profit. A reference to the "Farm and Garden Account," which is now carefully kept in a detailed form, and has appeared in the Annual Reports for the last Seven years (having been first introduced in the 21st Report of the Asylum for the year 1872), will show a larger balance in favour of the Farm and Garden than the previous year, notwithstanding the failure of the potato crop.

I also gladly acknowledge the efficient Services and co-operation of Mr. Elliott, the Chief Attendant, and of Miss Martin, the Housekeeper, who continues to devote her energies to the economical working of her department.

Other information of a Statistical nature will be found in the Statistical Tables appended.

I cannot conclude this Report without thanking the Chairman and Committee of Visitors for their valuable aid and support during the past year, and for their substantial recognition of my services.

I have the honour to be, Gentlemen,

Your Obedient Servant,

J. MURRAY LINDSAY, M.D.

Mickleover, Derby, February, 1879.
