I  
DE LAPIDIBVS VARIIS, TAM  
BITVMINOSIS QVAM ALIIS, CORNV

Ammonis, Conchite, Ctenite, Myite, alijsq;  
figuratis, Astroïte, Belemnite.

C A P. I.

**A**bsoluta iam nobis videri possit Admirabilis fontis hi-  
storia, cuius omnem vtendi modum ex principiis suis  
& similium fontium non dissimili collatione dedu-  
ctum in omni morborum genere persecuti sumus, nisi  
ambitiose illæ liberalioris Naturæ opes aurem vellerent, vt por-  
lydædalæ supellectilem tacitam præterire sine piaculo nequea-  
mus. Et certè admirabili isti ad stuporem vsq; fossilium & ve-  
getabilium varietati potissimum nomen debere voluit fontem  
ipsum instaurator Ill. Et quæ in eo genere è visceribus terræ eru-  
ta, quæ aquæ nostræ venis suis primum emanant decurrunt vè,  
non parvam nobis attulerunt lucem ad abstrusas necdum satis  
in vulgatas sub primam ætatis suæ metam virtutes indagandas.  
Quo factum vt horum plerorumq; libro primo meminimus,  
hactenus tamen vt summa duntaxat genera persecuti, indidè  
vires classicorum Auctorum suffragio elicere, quò sic nobis ad  
dicenda aditū faceremus, satis habuerimus. Multiplices autem  
vniuscuiusq; differentias, non eas quidem internas, sed quæ sub  
obutū cadunt, in hunc locū reseruauimus, vt habeat seu Lector  
seu Laborans quo grauioris disputationis tædia ceu diuerticulo  
amœniori leniat & leuet: vbi non tã fortè animi cõtentionem,  
quàm liberalem recreationē requiremus, atq; vt eò tū blandiùs  
inuitaremus, tū labascenti memoriæ subsidiū porrigeremus, icoz  
nibus expressa plerag; (quorum archetypa inter nostra cimelia  
asseruamus) potissimum quæ apud alios minùs obuia, breui ap-  
posito lemmate quo vniuscuiusq; nomen & qualiscumq; descri-  
ptionis rudimenta notantur, oculis subiicimus: hoc seruato or-  
dine, vt imitatione naturæ ab imperfectioribus exorsi ad perfe-  
ctiora gradum faciamus.

Bitumen fossile durius ad Gagaten accedens, discursantibus hinc inde venulis marmoris candidi metallici, gemino lapidi fissili interiectum.

Bituminis fragilioris quam præcedentis Gagatis figuræ duæ prout comperitur inter fissiles lapides.

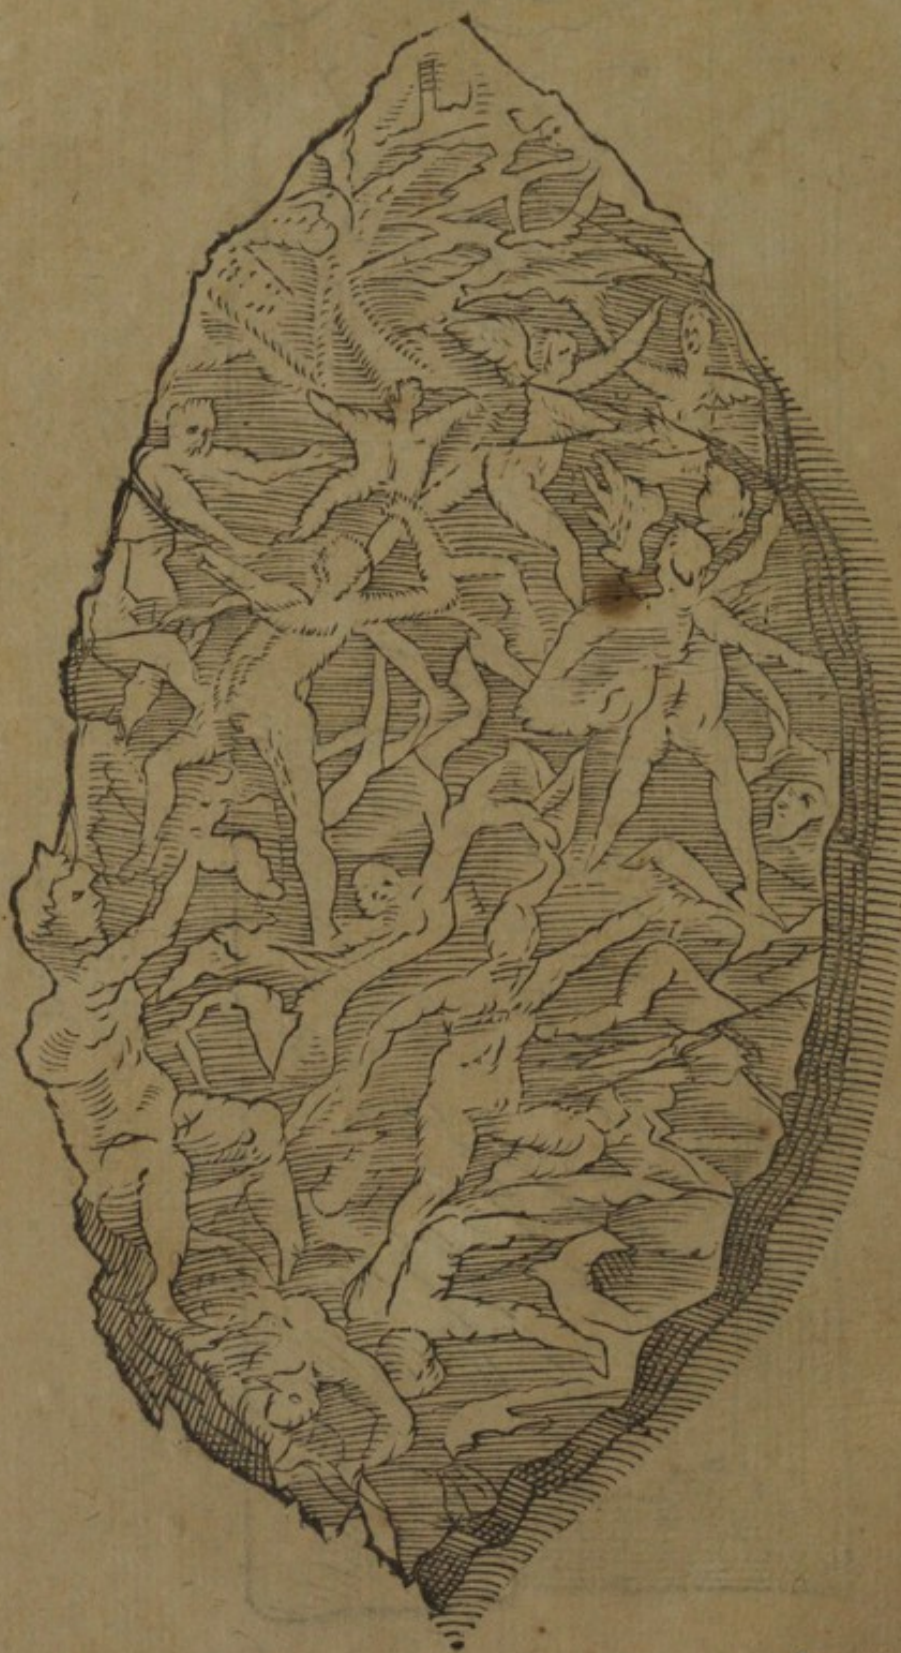

Lapis

Lapis fissilis, in laminas, sibi mutuò instar foliorum  
palinxfi incumbentes, diuiduus.

Lapis fissilis per quem discurrentes venæ ex argilla cinerea delicatius lapidescente, arborē coralli instar patulam in ramos hinc inde diffusos representat.

Malè figurarum personarum siue pictor siue sculptor addidit.

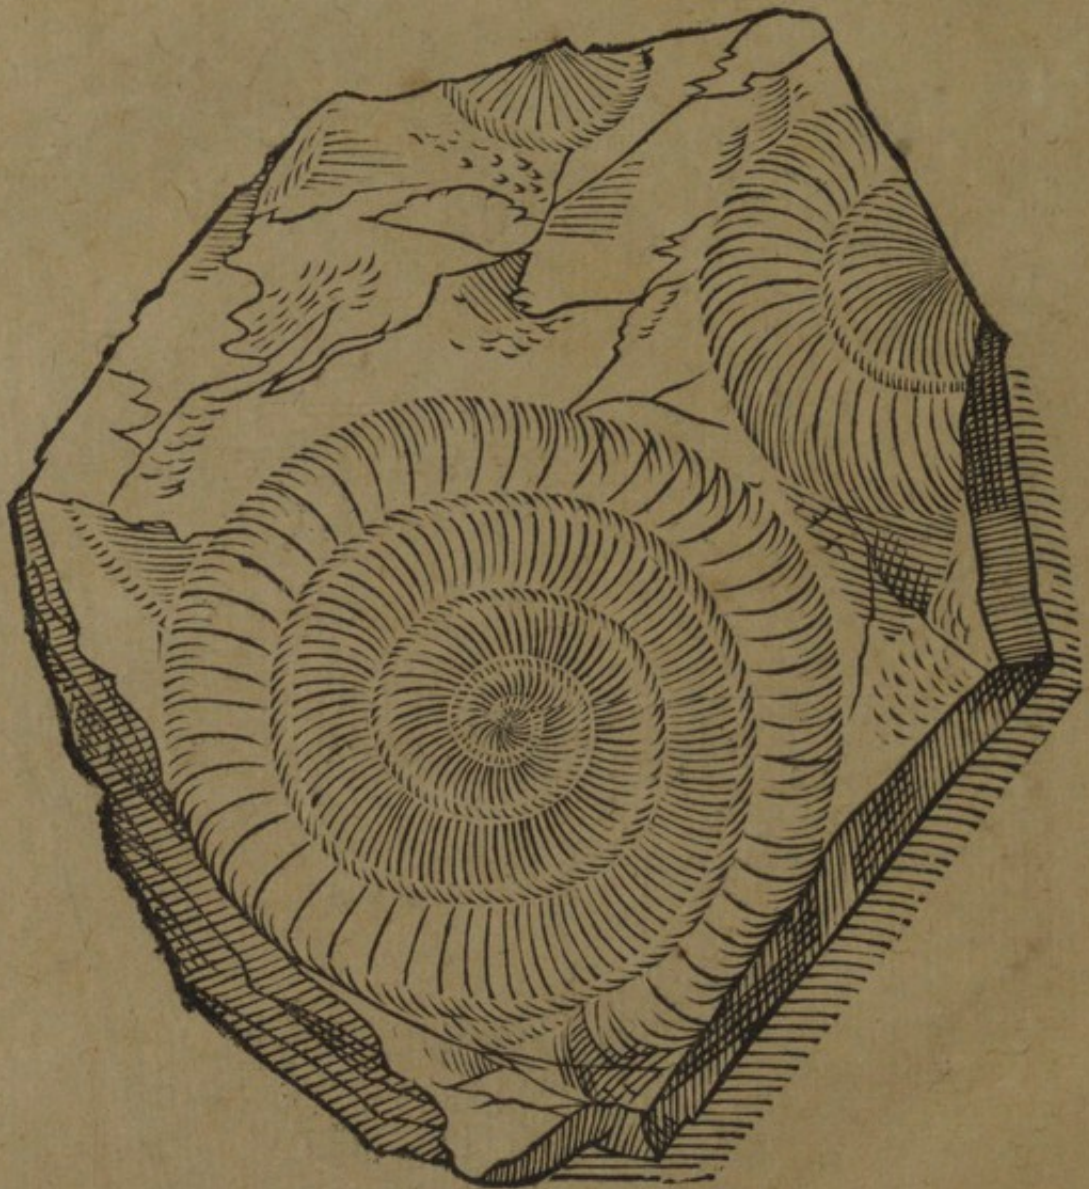

Ammon

Ammonis cornu sine armatura, vnà cum conchæ  
rugatæ conuexo, in lapide fissili.

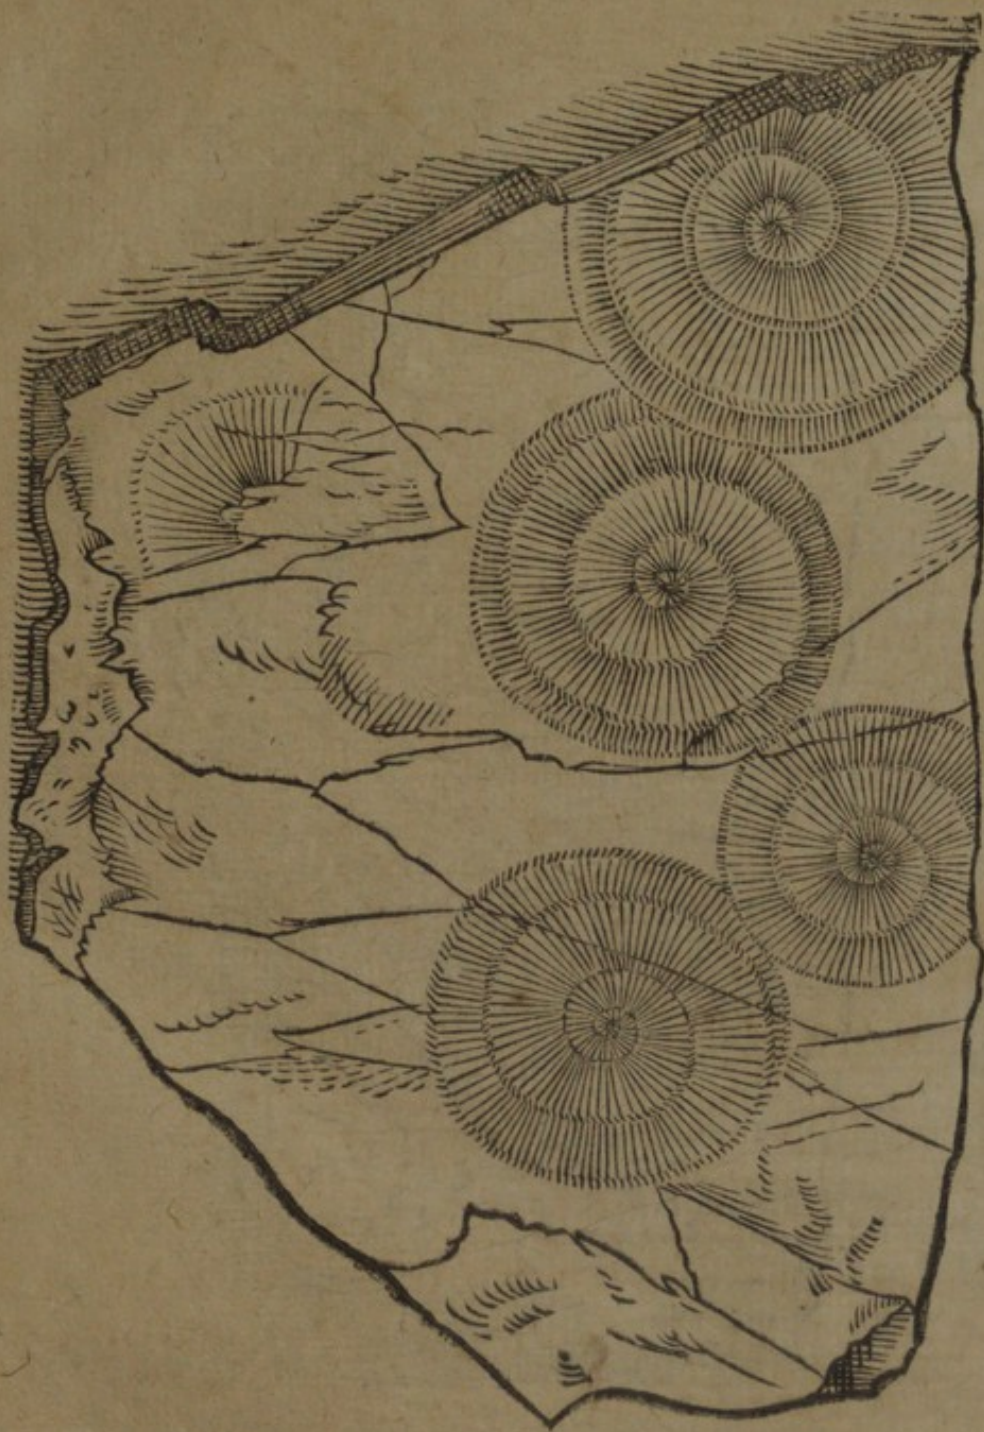

Lapidi fissili insculptum Ammonis cornu helicoides.

Ammonis

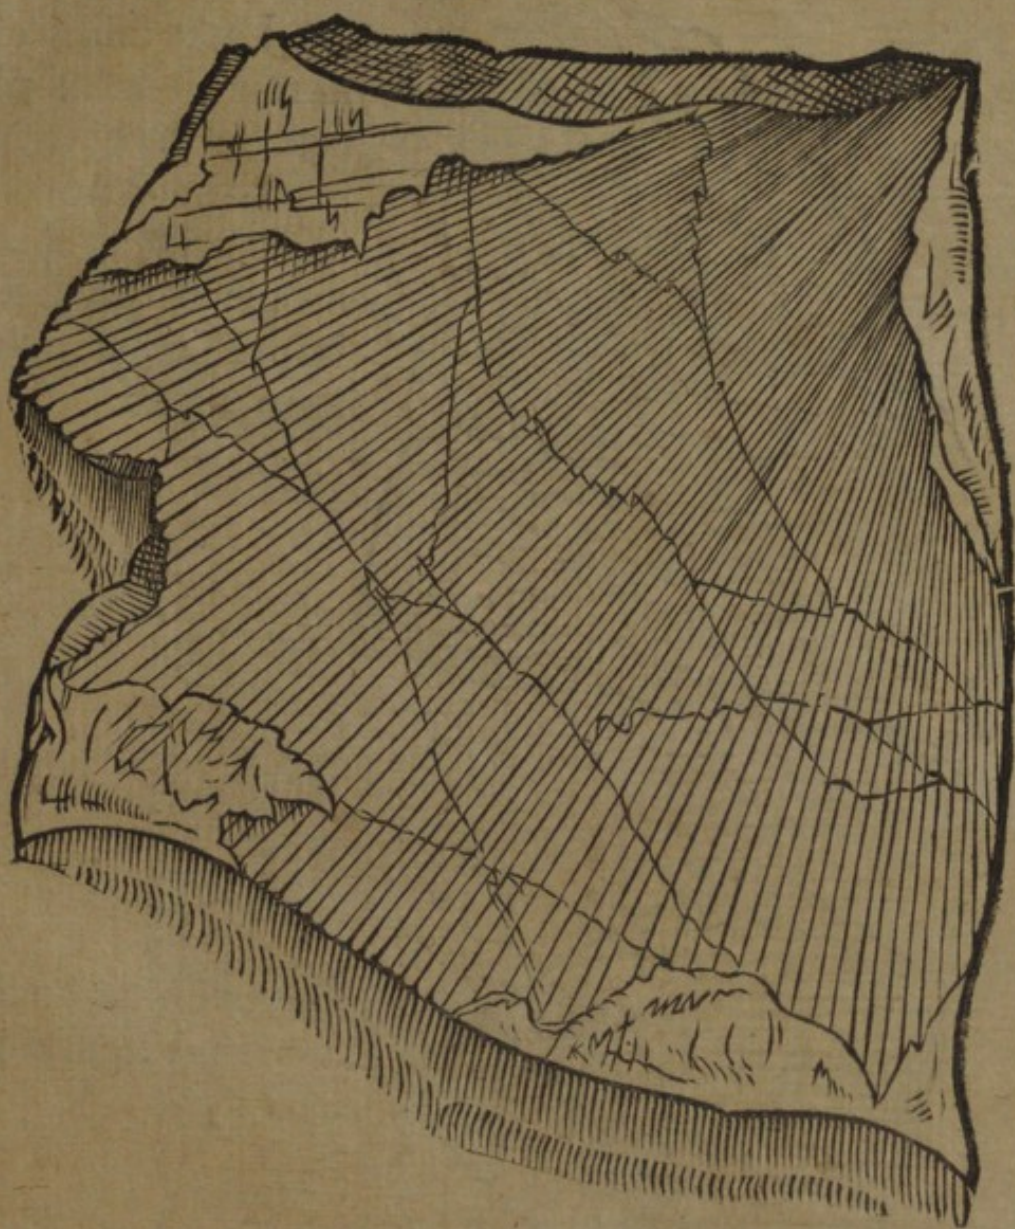

Ammonis cornu hoplites multiplex, obscure  
lucens, in lapide fissili,

Ammonis cornua parua magnis intermista, armaturæ  
 expertia. Sculptor dimidiam vix partem expressit.  
 Lapis

Lapis fissilis cui insculpti fulgentes ra-  
dij flauj nitore solares prouocant.

Lapis fissilis cî-  
nereus, cui inscul-  
ptæ serpentum in  
se conuolutorum  
spiræ, velut ab Am-  
monis cornu dicto  
impressæ: concha  
item rugata:

Lapis fissilis coch-  
leis paruis figuratus.

Lapi-

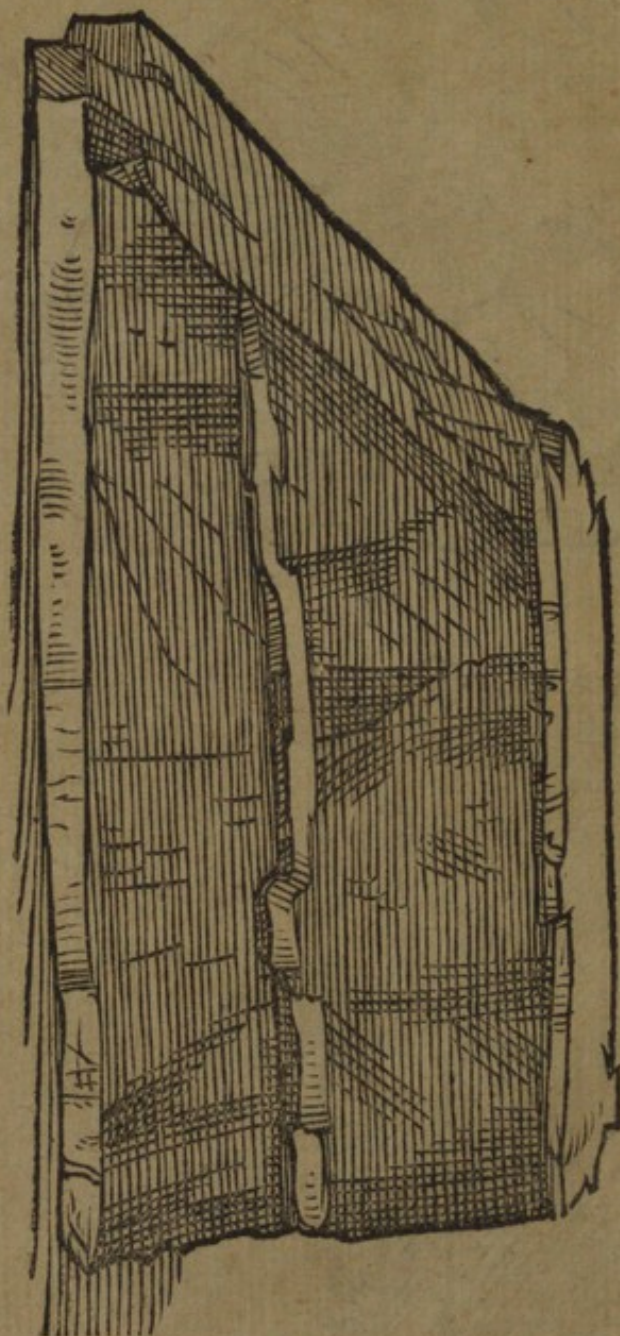

Lapidi fissili adhærens  
nitella lucida,  
orichalcû colore referens.

In lapidis fissilis cinerei  
interueniis fluores albi,  
quibus ob similitudinem,  
lapidi petrei nomen feci-  
mus.

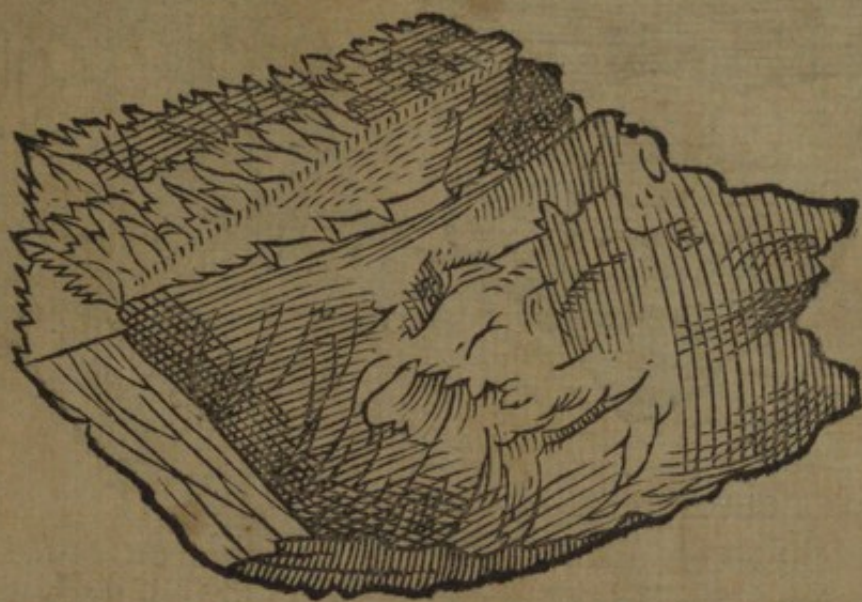

Lapis cinereus fissilis triplici vena laridi  
petrei intersectus.

Lapidi

Lapidi cinereo adnati fluores albi, partim rutili, cum micis pyritæ ærofi.

Lapis cinereus in quo radix effracti belemnitis radiati: eidem adnati fluores albi, cum pyrite, & portiunculis Cadmiæ fossilis.

Lapis cinereus alternis  
zonis fluorum alborū in-  
teriectis, quibus auersa  
parte pyrites respondet.

Lapis cinereus, cum v-  
nicâ zona fluorum albo-  
rum supra quam lapidi ci-  
nereo innatę micæ pyritę.

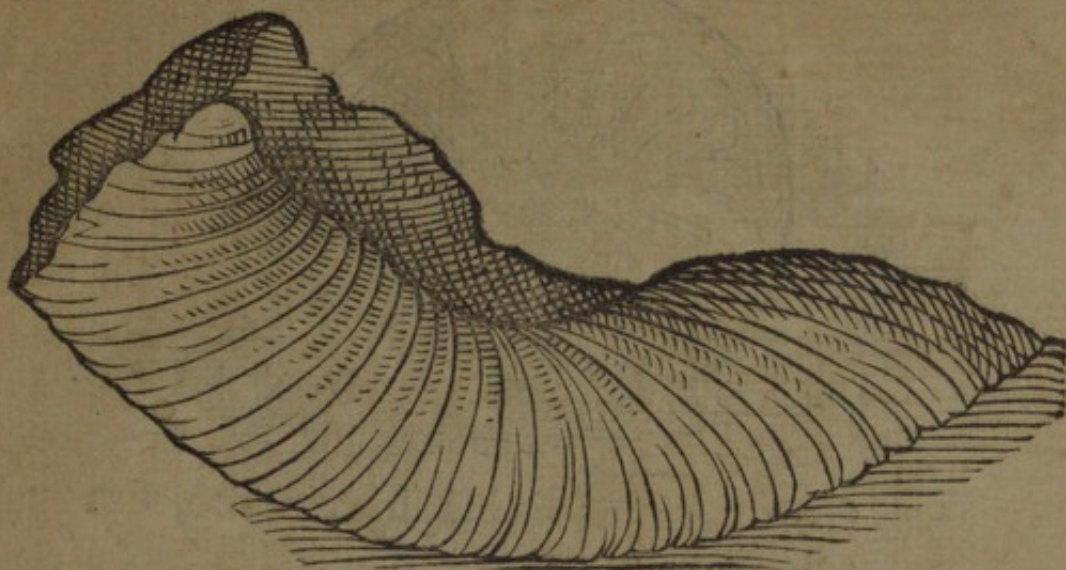

Lapis cinereus candidior,  
zonis distinctus, superiore  
fluorū alborū cui subiacet fim-  
bria pyritæ, inferiore pyritæ  
ferrugineo colore ferè præditi.

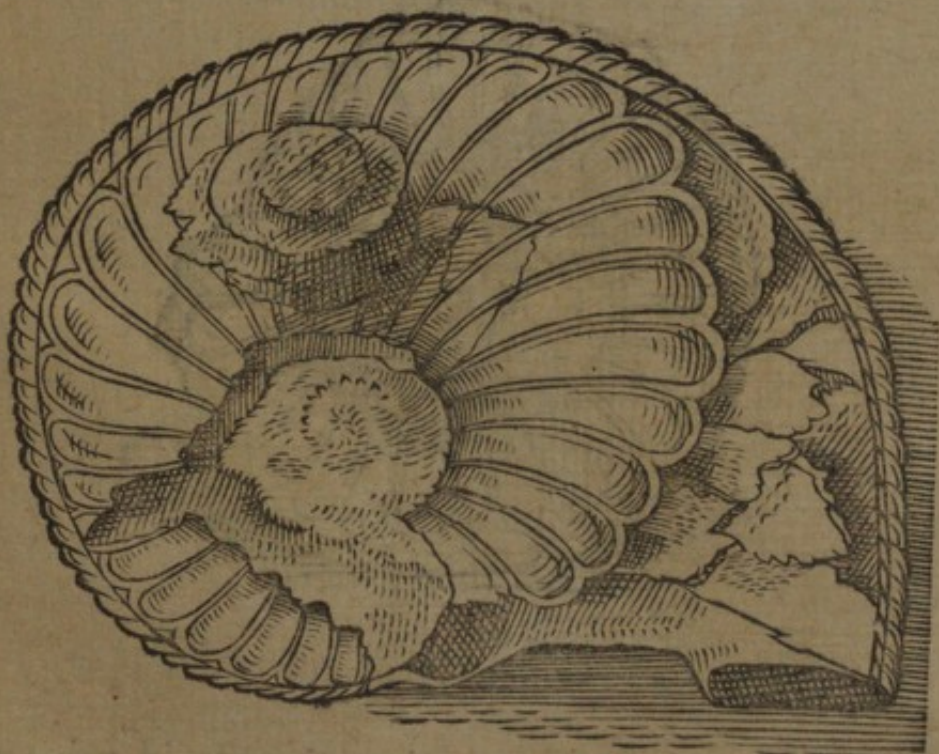

Lapis cinereus cum fluore  
albo & pyrite.

Lapidis

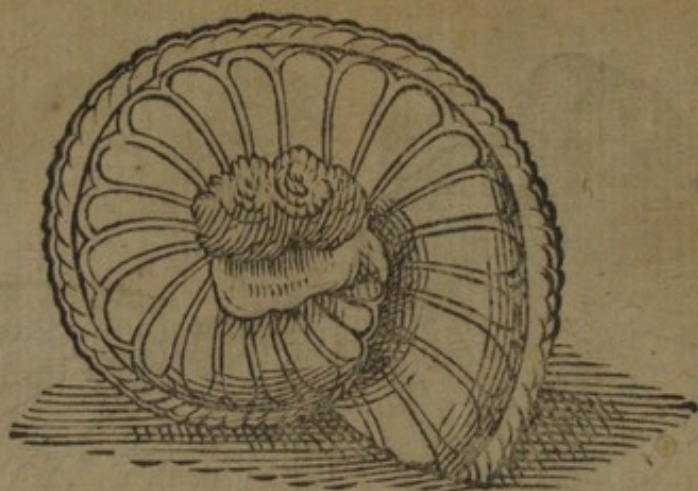

Lapidis ex albidis fragmentum caprini cornu effigie repertum  
ad montem Eichelberg, de quo libro primo.

Ammonis cornu maiusculum, alicubi hoplites.  
Cornu

Cornu Ammonis è lapide cinereo, cum  
tuberibus pyritæ.

Ammonis cornu ex lapide cinereo, in cuius medio  
extuberat pyrites ærosus.

Ammo-

Ammonis cornu, inæqualibus pyritæ ærofi  
tuberibus asperatum.

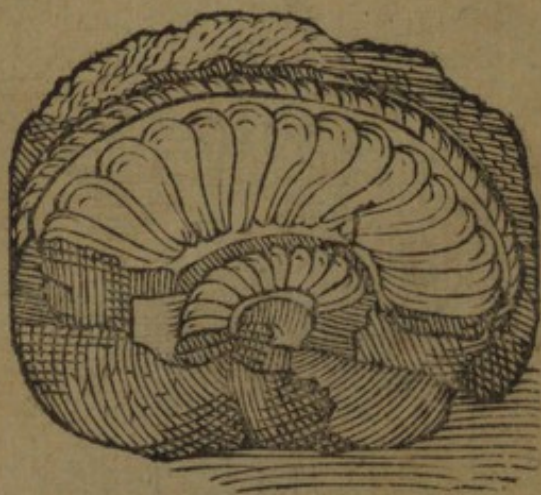

Ammonis cornu hærens pyritæ.

Pyrites ærofus cristatus.

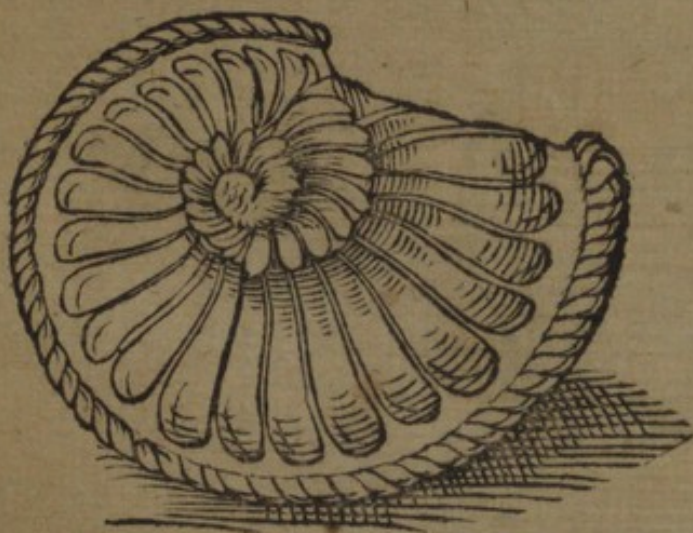

Pyrites globosus, cui primæ cornu Ammonis spiræ adhærent.

Ammono-

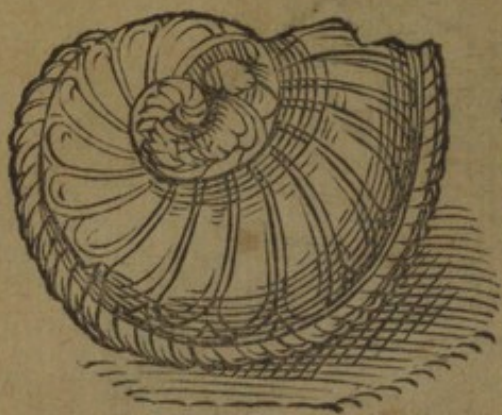

Ammonis cornu maiusculi fragmentum lapidum.

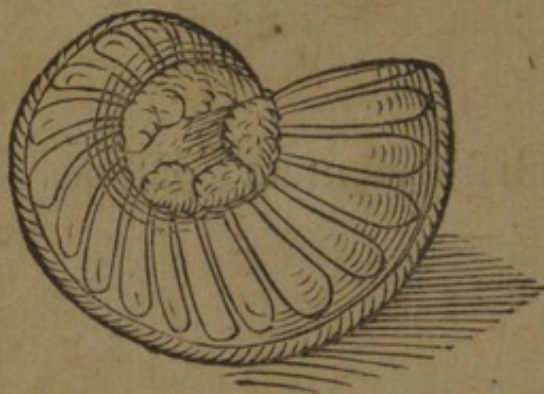

Cornu Ammonis è lapide cinereo, & circa medium muricatum, quod non expressit sculptor.

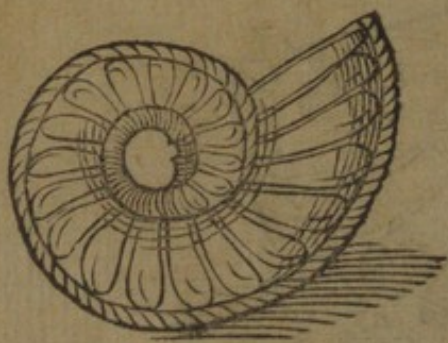

Cornu Ammonis lapideum  
spiculis circa umbilicum do-  
natum, quæ pictor non ex-  
pressit.

Cornu ammonis hoplite  
cristatum cum micis pyritæ.

Cornu Ammonis cristatum  
pertusum.

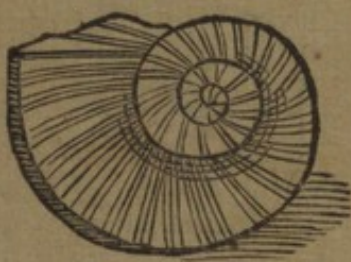

Cornu Ammonis spinulis centrum ambientibus.

Cornu Ammonis simplici spirâ, umbone prominulo.

Cornu Ammonis densè striatum armatura lurida.

Cornu Ammonis  
perpusillum lucida  
ænea armatura ob-  
ductum.

Cornu Ammonis  
pusillū aliud cū ar-  
matura ferruginea.

Cornu Ammonis  
paruum.

Cornu Am-  
monites mi-  
nimum.

Cornu Ammonis pu-  
sillum, læue, armatura  
ænea lucente.

Cornu Ammonis læue, ar-  
matura ænea lucente.

Ammonis cornu paruum.

Annulus coloris orichalcei  
cum pyrite granulato.

Cornu Ammonis cum arma-  
tura orichalcea læue.

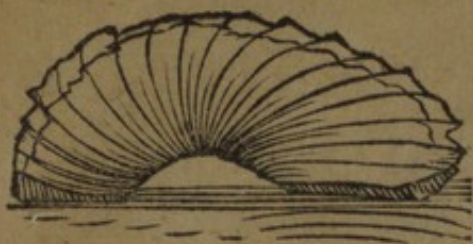

Matrix fusoria cornu  
Ammonis

Cornu Ammonis  
cristatum cum pyrite mi-  
nimis micis constante.

Arcus

Arcus cornu Ammonis im-  
pressi in lapide cinereo.

Cornu Ammonis frag-  
mentum tribus dimidiatis  
annulis constans.

Annelli seu cornu Ammonis fragmentum,  
spiris aëneo colore splendentibus.

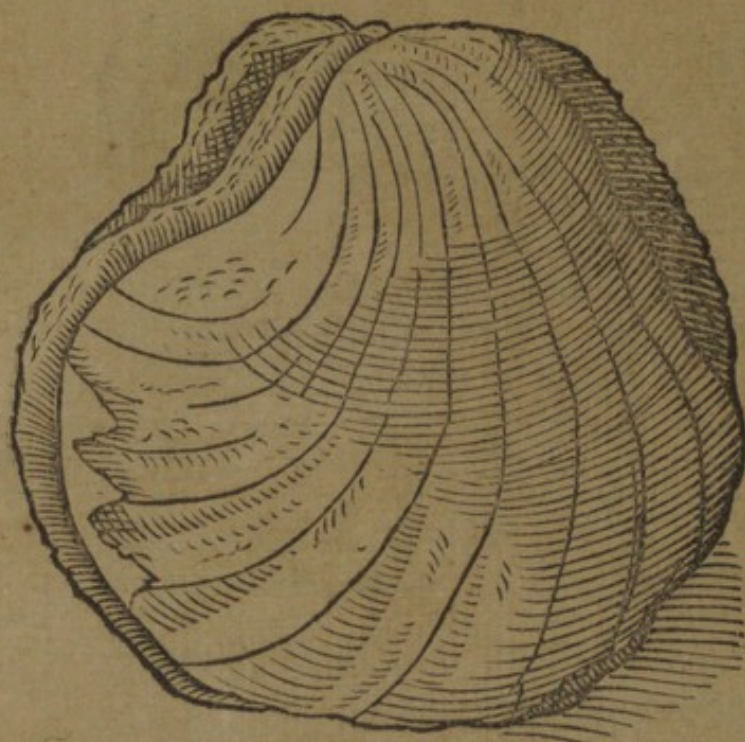

Cornu Ammonis frag-  
men duobus dimidiatis  
annulis constans.

Cornu Ammonis ho-  
plitæ fragmentum.

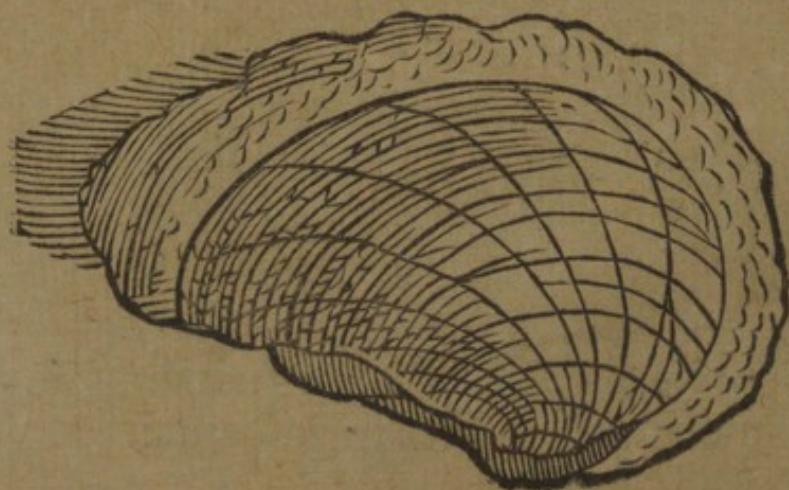

Cornu Ammonis veluti ex topho a-  
dusto campoides granulatū cinereum,  
quod potuisset melius pingi.

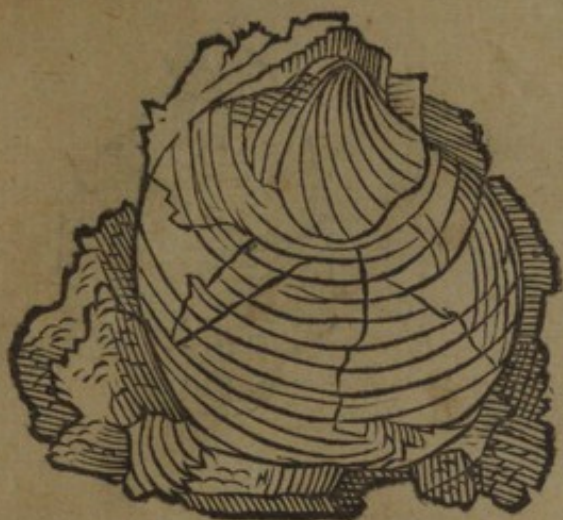

Dum foditur  
crypta in Ill. E.  
C. paradiso, quæ  
Môtbelgardi co-  
latur, anno 1594.  
inuenti conchitæ  
duo cinerei, quos  
argumenti affi-  
nitate ducti non  
absurdè hîc pro-  
posituri vide-  
mur. Prior con-  
chites est bival-  
vis striatus. Alter  
est Mytilus bis-  
foris.

Inuentum est & cornu Ammonis è filice cinereo du-  
rissimo, pedem in diametro colligens.

Chama

Chamalapidealæuis.

Chama rugata è lapide  
cinereo.

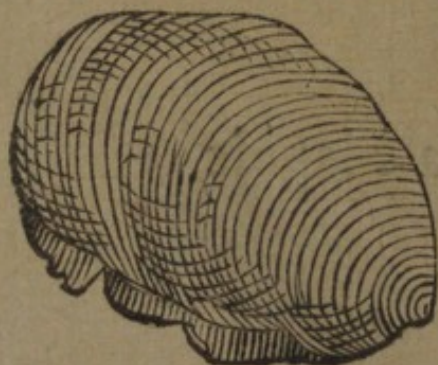

Conchites cinereus rugosus  
laminæ instar tenuis filicem  
sinu contineus.

Chama rugata è lapide  
cinereo altera.

Chama rugata è lapide  
cinereo,

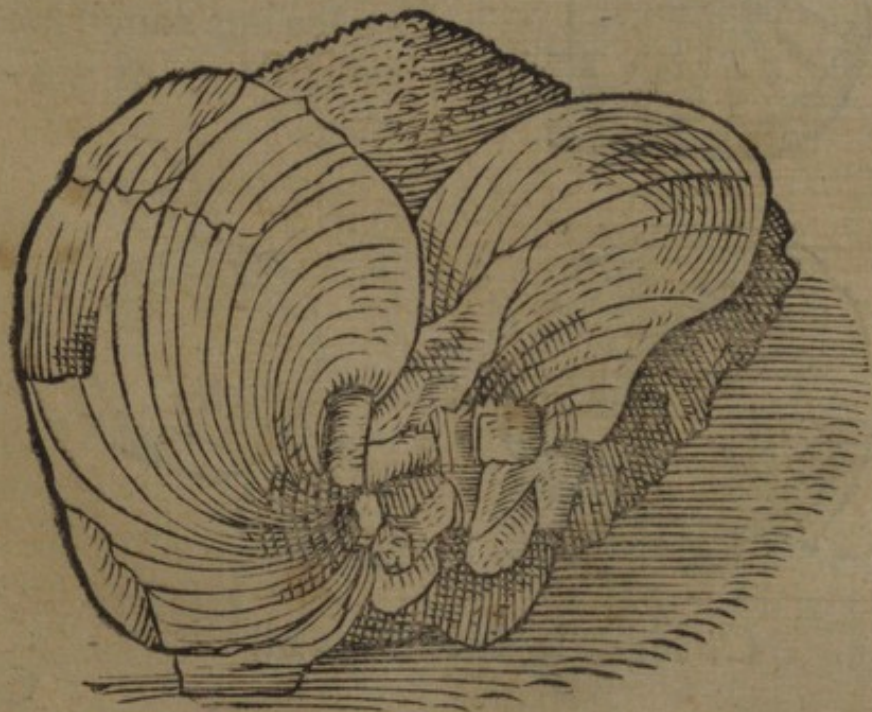

Concha rugata lapidea  
cinerea.

Lapis

Lapis mytuli concauum, cum pectunculi contexto exprimere.  
Mytulus non benè sculptus.

Conchites duplex lævis, cinereus, laminæ instar tenuis, lapidem  
fuscum sinu suo complexus.

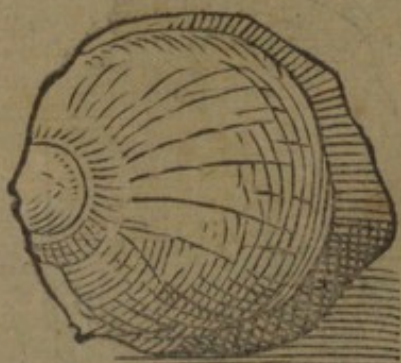

Pecten.

Pecten è pyrite pro vario  
obtutu varios colores exhi-  
bens.

Pyrites conchytae  
vestigis cauis no-  
tatus.

Chamula lapidea lævis biforis.

Chama

Chama petræa.

Pulchella conchula lapide cinereo infixa.

Fragmentum cornu Ammonis hoplitæ.

Strombites obiter armatus.

Pectunculus bis foris compressus lapideus, obscure armatus.

Pectunculi petræi biformes duo alij.

Conchula striata lapidea.

Conchites striatus hoplites bivalvis.

Pectunculi lapidei biferes alij.

Conchites lævis niger  
punctatus.

Chama lævis silicea quem  
ob formam telliniten appelles  
licet.

Lapillus nucleum Auel-  
lane referas.

Chama parua petræa.

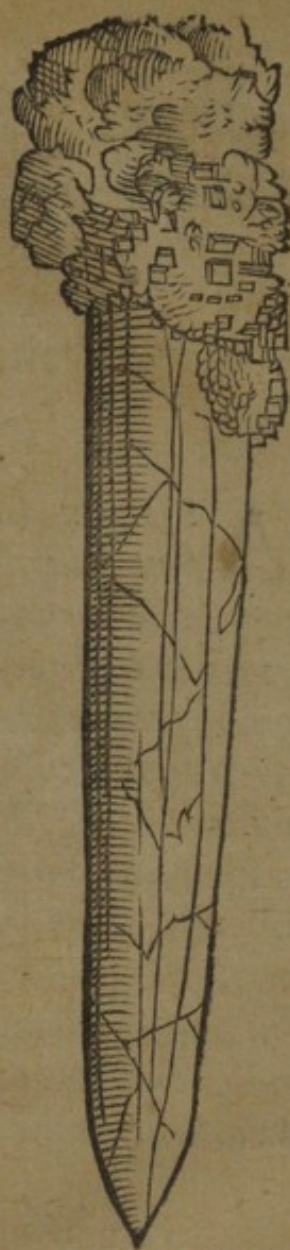

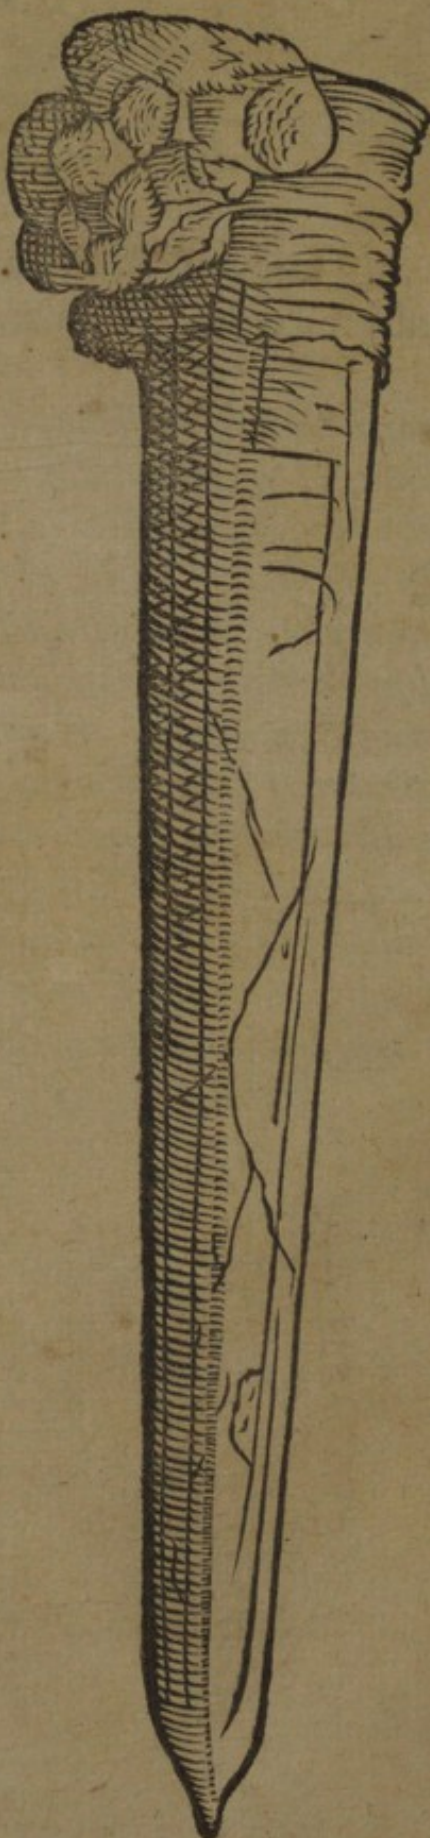

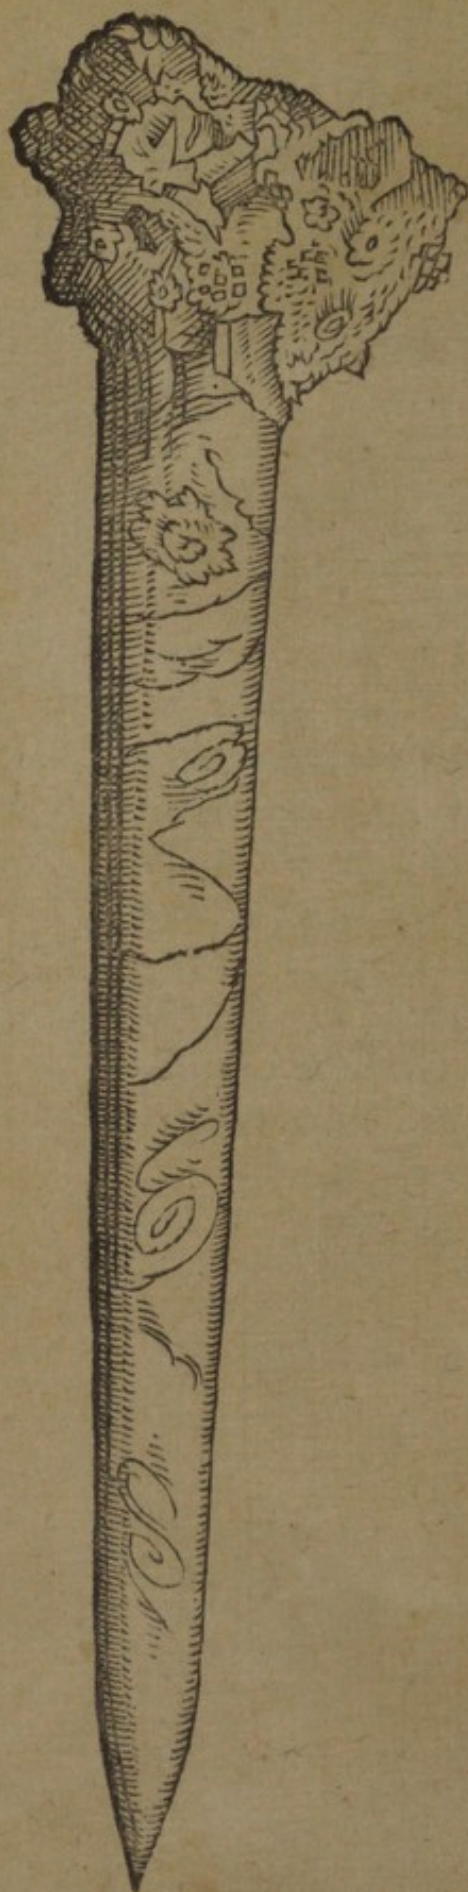

Astroitæ varij maiores, minores, concinnè  
alij radiati, alij minùs.

**A**lter ex *Astroitis nostris* similem pingit *Gesnerus lib. de figuris lapidum &c.* quem ita describit fol. 37. facie prima: *Asterias vel Sphragis asteros* dici potest hic lapis, cui magnitudo ferè qua hic exhibetur. In hoc quem ab illustri & nūquam satis laudato barone, totius antiquitatis incomparabili scrutatore *Vvilhelmo Vvernhero* prope *Roteuillam*, ubi reperiuntur in colle edito ad *Cimmeriam arcem*, accepi, octoni coherabant, ita concinnè iuncti & aptati, velutiq; superinnati sibi inuicem, (separabiles tamen) ut nullus artifex potuisset melius. Singulis utrinq; stellæ figura ceu sigillo impressa vel insculpta videtur. Radij eminent suis angulis quini: inq; singulis radiis cauitas media est. Margines striis transuersis sulcantur. Substantia eorū prædura est. *Sternstein* dici potest Germanice.

Belemni-

Belemnitæ in acumen eleganter fastigiati, quorum basin ex terra argillofa cinerea enatam ambit pyrites auricolor: substantia pleraque solidissima, striis rubris in centrum vergentibus radiata; ad basin, & suprâ paulo, intus fluor albus infarcit.

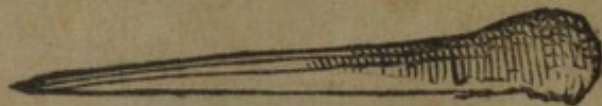

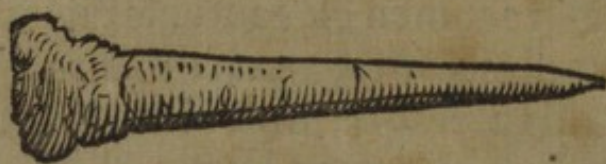

Belemnites radiatus cum armatura lucidissima viridanti cuius substantiam pyrites subinde penitus opplet.  
Fragmentum belemnitæ hoplitæ armatura orichalcea.

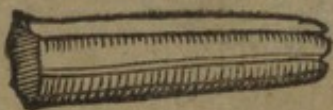

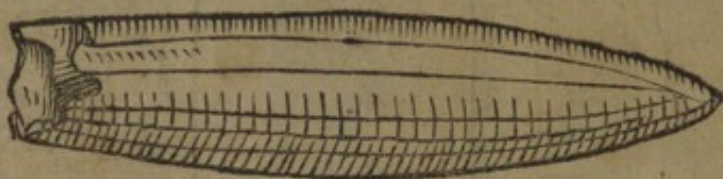

Belemnites cinereus alatus.

f

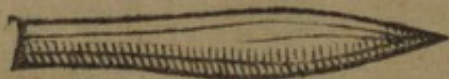

Belemnitæ parui.

Belemnitæ canaliculati.

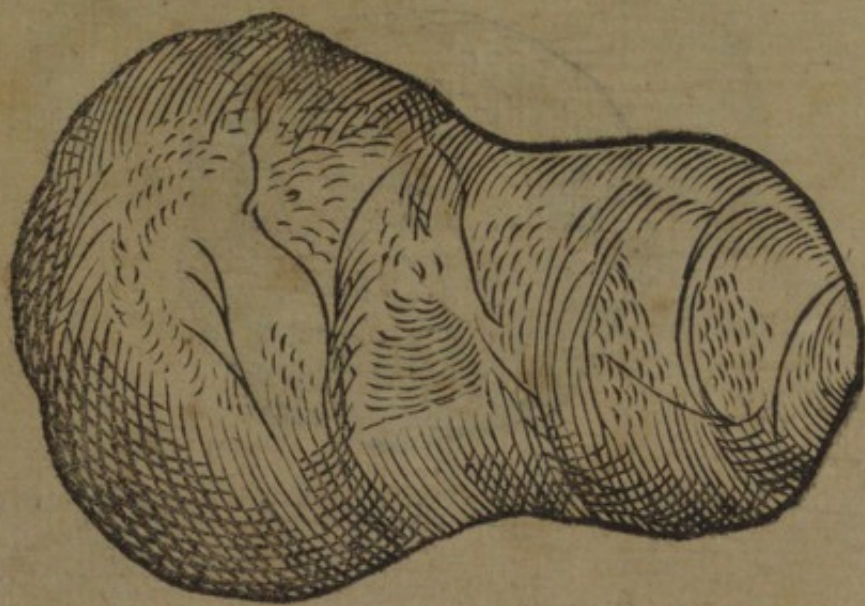

Belemnites fusi instar, ventre crassiore in acumen vtrinque desinente.

Belemnites cinereus dentis canini modo, triplici sulco exaratus.

Lapis

Lapis cinereus vterum vel cucurbitam la-  
genatam exprimens.

Lapis cinereus cystoides Iudaico similis.

Nux myristica lapidea cinerea, in qua tamen pictor  
nimis artificiosas exprefsit venas.

Nuxalia lapidea.

Silex cinereus pistacii  
fructum exprimens.

Auellana lapidea. Figura debet  
esse obtusior.

Silex cinereus auellanae  
domesticae effigiae.

Globulus lapideus.

Lapis cinereus femiounalis;  
costa per mediam longitudi-  
nem leuiter surrecta.

Lapis

Lapis cinereus cristatus.

Pyrites anthropomorphos.

Caput galeatum è pyrite.

Pyrites causiæ venatoriæ forma.

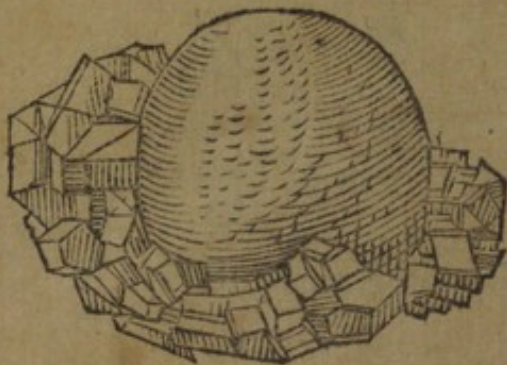

Tiaram Turcciam exprimens pyrites.

Pyrites leuiter turbinatus basi latiore. Malè pictus.

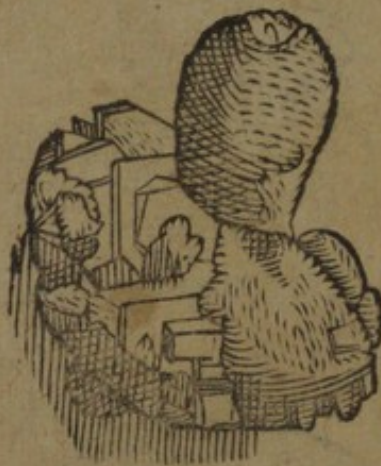

Pyrites luto cinereo alternatim  
mistto ferruminatus, pilei æmulus,  
oris tessellatis reflexis, cuius latus  
ornât, tessellæ copiosiores aurico-  
lores, quæ pro cristis sunt.

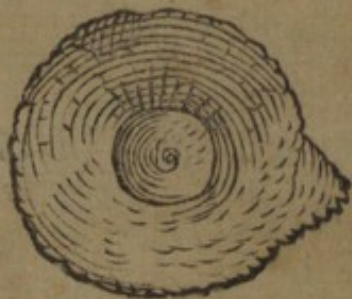

Pyrites oralis cum  
tessellati alterius frag-  
mento.

Pyrites gibbosus, quem cornu  
Ammonis parum fœliciter à pi-  
expressum sustentat.

Tiaram referens pyrites.

Pyrites inæqualiter globosus,  
lacuna in medio veluti oculum  
exprimente.

Pyrites

Pyrites ærosus globosus tessellatus umbilicatus.

Truncum humani corporis referens pyrites.

Pyrites

Pyrites meroïdes.

Pyrites ærosus cystoides.

Pyrites vesicam referens.

Pyrites membrum genitale exprimens.

Pyrites phalloïdes cum annexa vesica ex tessellis minutioribus.

Pyrites ærosus scrosum referens raphe seu tauro suo sulcatum.

Pyrites

Pyrites phalloides.

Pyrites oblongus phalloides  
glandem annulo cum arma-  
tura ænea infibulatus.

Pyrites phalloides.

Pyrites ærosus phalloeides.

Pyrites phalloides.

Pyrites ærosus phalloides.

Pyrites phalloides.

Pyrites ærosus annulo reflexo  
caudam implicante.

Pyrites cinereus cadmiæ  
factitiæ botryten referens, an-  
nellis lucentibus aurei coloris  
circa medium vmbilicum cō-  
volutis.

Pyrites tuberofus inæqua-  
lis ani mariscas imitatus.

Pyrites ani condylomata in-  
æqualibus tuberibus referens.

Pyrites

Pyrites condylomata referens  
alius, lapide cinereo remixtus.

Pyrites ærosus carycoides.

Pyrites ærosus calceum  
exprimens.

Pyrites fuscus marmor me-  
tallico remixtus cum annulis  
lucentibus.

Chenopoides pyrites ærosus

Pyrites.

Pyrites conchæ similis.

Pyrites ærosus botrytes cristatus.

Pyrites botryoides compressus.

Pyrites

Pyrites botryoides.

Pyrites pyriformis minus  
foeliciter pictus.

Pyrites exiguus pyriformis, in  
quo apparet veluti imma-  
tura glans, quam pictor  
non expressit.

Pyrites pyriformis  
alter.

Pyrites cucurbitæ  
lagenariæ facie.

Pyrites ærosus balanoeides.

Pyrites urnulam referens,  
fundum tessellis è pyrite  
æroso cinctus.

Pyrites ærosus tes-  
sellatus.

Pyrites ærosus  
cum rupe tessela-  
ta minorû py-  
ritarum, & ovis  
piscium.

Pyrites

Pyrites globosus tessellis  
minutioribus exasperatus.

Pyrites globosus in tessellis  
protuberans, lacunā  
altera parte impressam ha-  
bens.

Pyrites globosus alter tessellis  
innitens, in medio umbilicem ha-  
bens protuberantem.

Pyrites globosus minutis tessellis  
constans, in qua la-  
cuna insculpta.

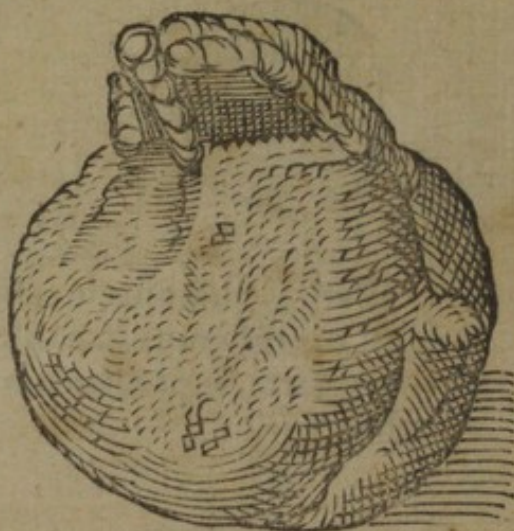

Pyrites globosus pusillus, hinc inde  
punctis prominulis micans.

Pyrites parvus rotundus angulosus.

Pyrites globosus. lapide  
cinereo altera parte pro-  
tuberante.

Pyrites globosus com-  
pressior, utrinque umbilica-  
tus, minimis tessellis con-  
stans.

Pyrites tessellatus tubero-  
sus umbilicatus.

Pyrites globosus pro-  
minente tubere.

Pyri-

Pyrites mastoides.

Pyrites ærosus cornu  
Ammonis cristatus.

Pyrites globosus cuius  
summo cacumini insidet  
cornu Ammonis nonni-  
hil echinatum.

Pyrites conum pini ferè  
exprimens : sed pictor op-  
positam obuertit partem.

Pyrites scintillans, altera parte gib-  
bosus, inter nitellas auricolores pas-  
sim interueniente cinereo lapide mol-  
liori, aduersa parte planus, diffractus,  
umbilicum obsidēte liuida ceu galena  
nitida, quam ambit lapis cinereus.

Pyrites ē granulis mi-  
nutis compactus.

Pyrites ærosus tessella-  
tus cum corniculo lapi-  
deo cinereo : ad testudi-  
nem accedit.

Pyrites cum magna tessella  
pyramidali ex lacuna prodiēte.

Pyrites inæquali cuborum  
serie confragosus.

Pyrites

Pyrites tessellatus.

Pyrites vtrinque turbinatus  
cum columnellis.

Pyritæ parui angulosi cum columnulis.

Pyrites ærosus turbinatus quadruplici  
costa è tessellis sibi mutuò impositis.

Pyritæ quaterno columnellarum  
concurfu constantes.

Pyrites turbinatus  
acutior incurvus.

Pyritis ex quatuor colu-  
mnellis ad angulos rectos se  
interfecantibus compositus.

Pyrites cum quatuor  
columnellis tessellatis.

Pyrites minimus cum  
columnellis tessellatis.

Pyrites tessellatus, angu-  
losus, turbinatus.

Pyrites angulosus  
alius.

Turbo minimus scintillans.

Pyrites turbinatus ma-  
gnus muricatus.

Pyrites ærosus subrotundus echinatus.

Pyrites tessellatus echinatus.

Pyrites globosus & angulosus.

Pyrites ærosus obscurus rugosus, cornu cervini radices referens.

Pyrites ærosus obscurus campocides cum annulo lucido.

Pyrites ærofus cadmoides.

Lapis cum pyrite mixtus  
bistortæ radicem referens.

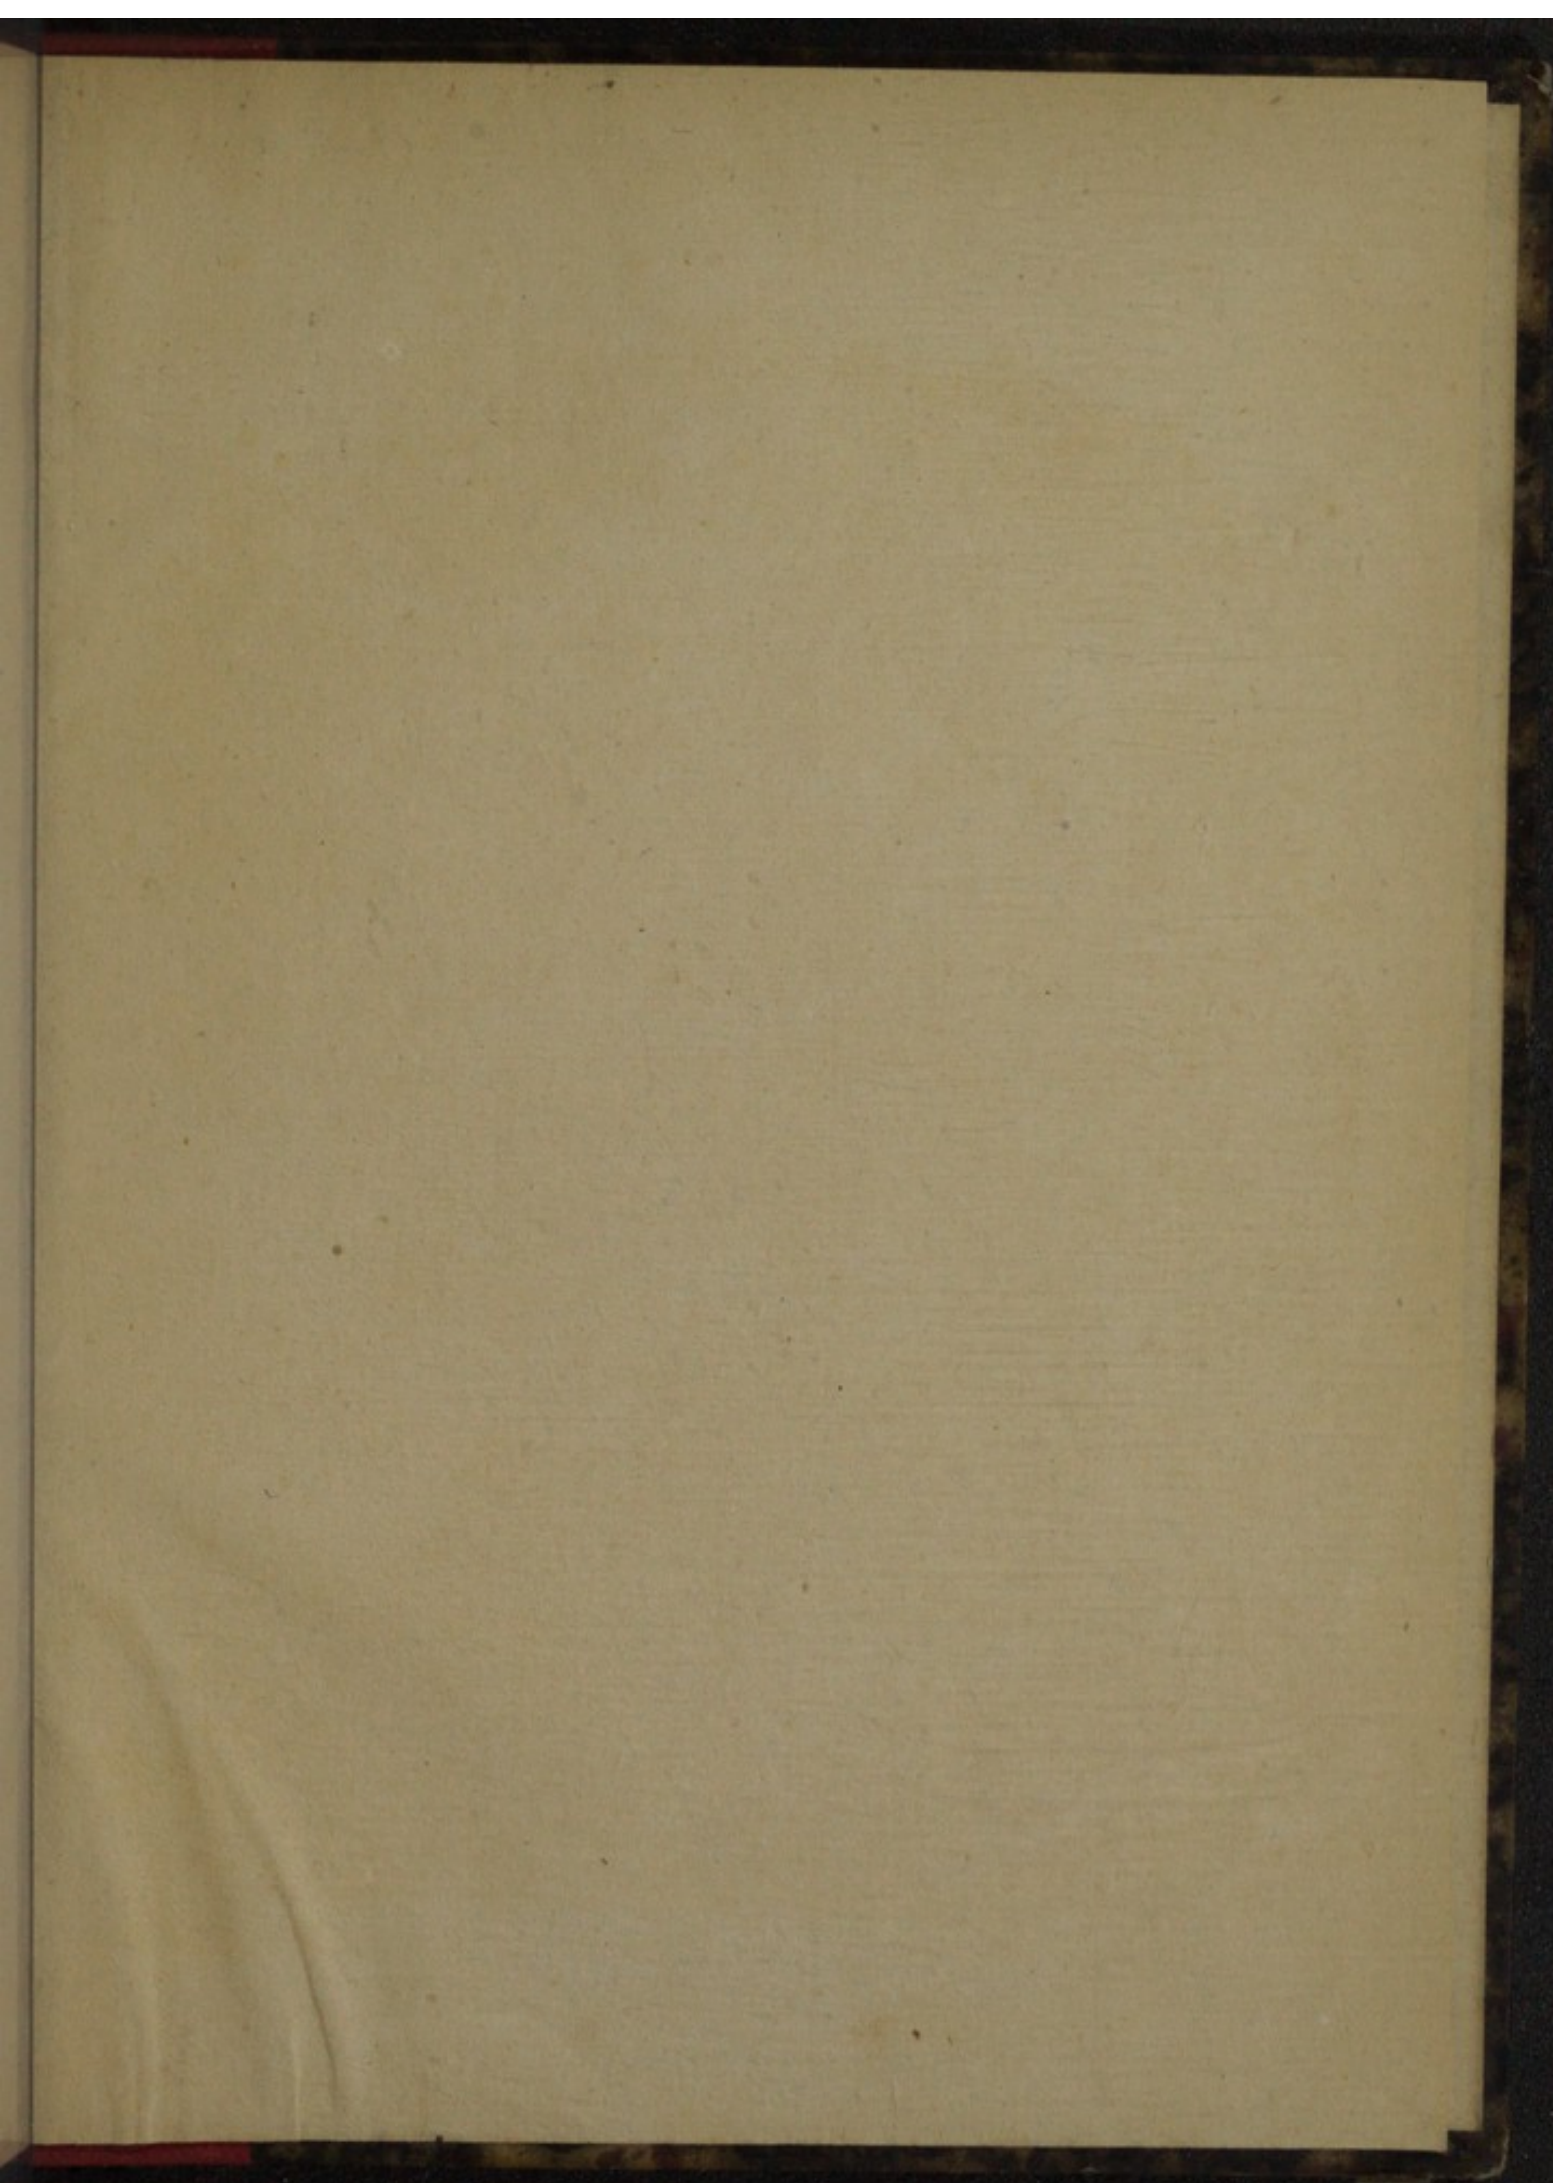

Pyrites cadmoides lu-  
cens oua piscium ex-  
hibēs minus diligen-  
ter pictus.

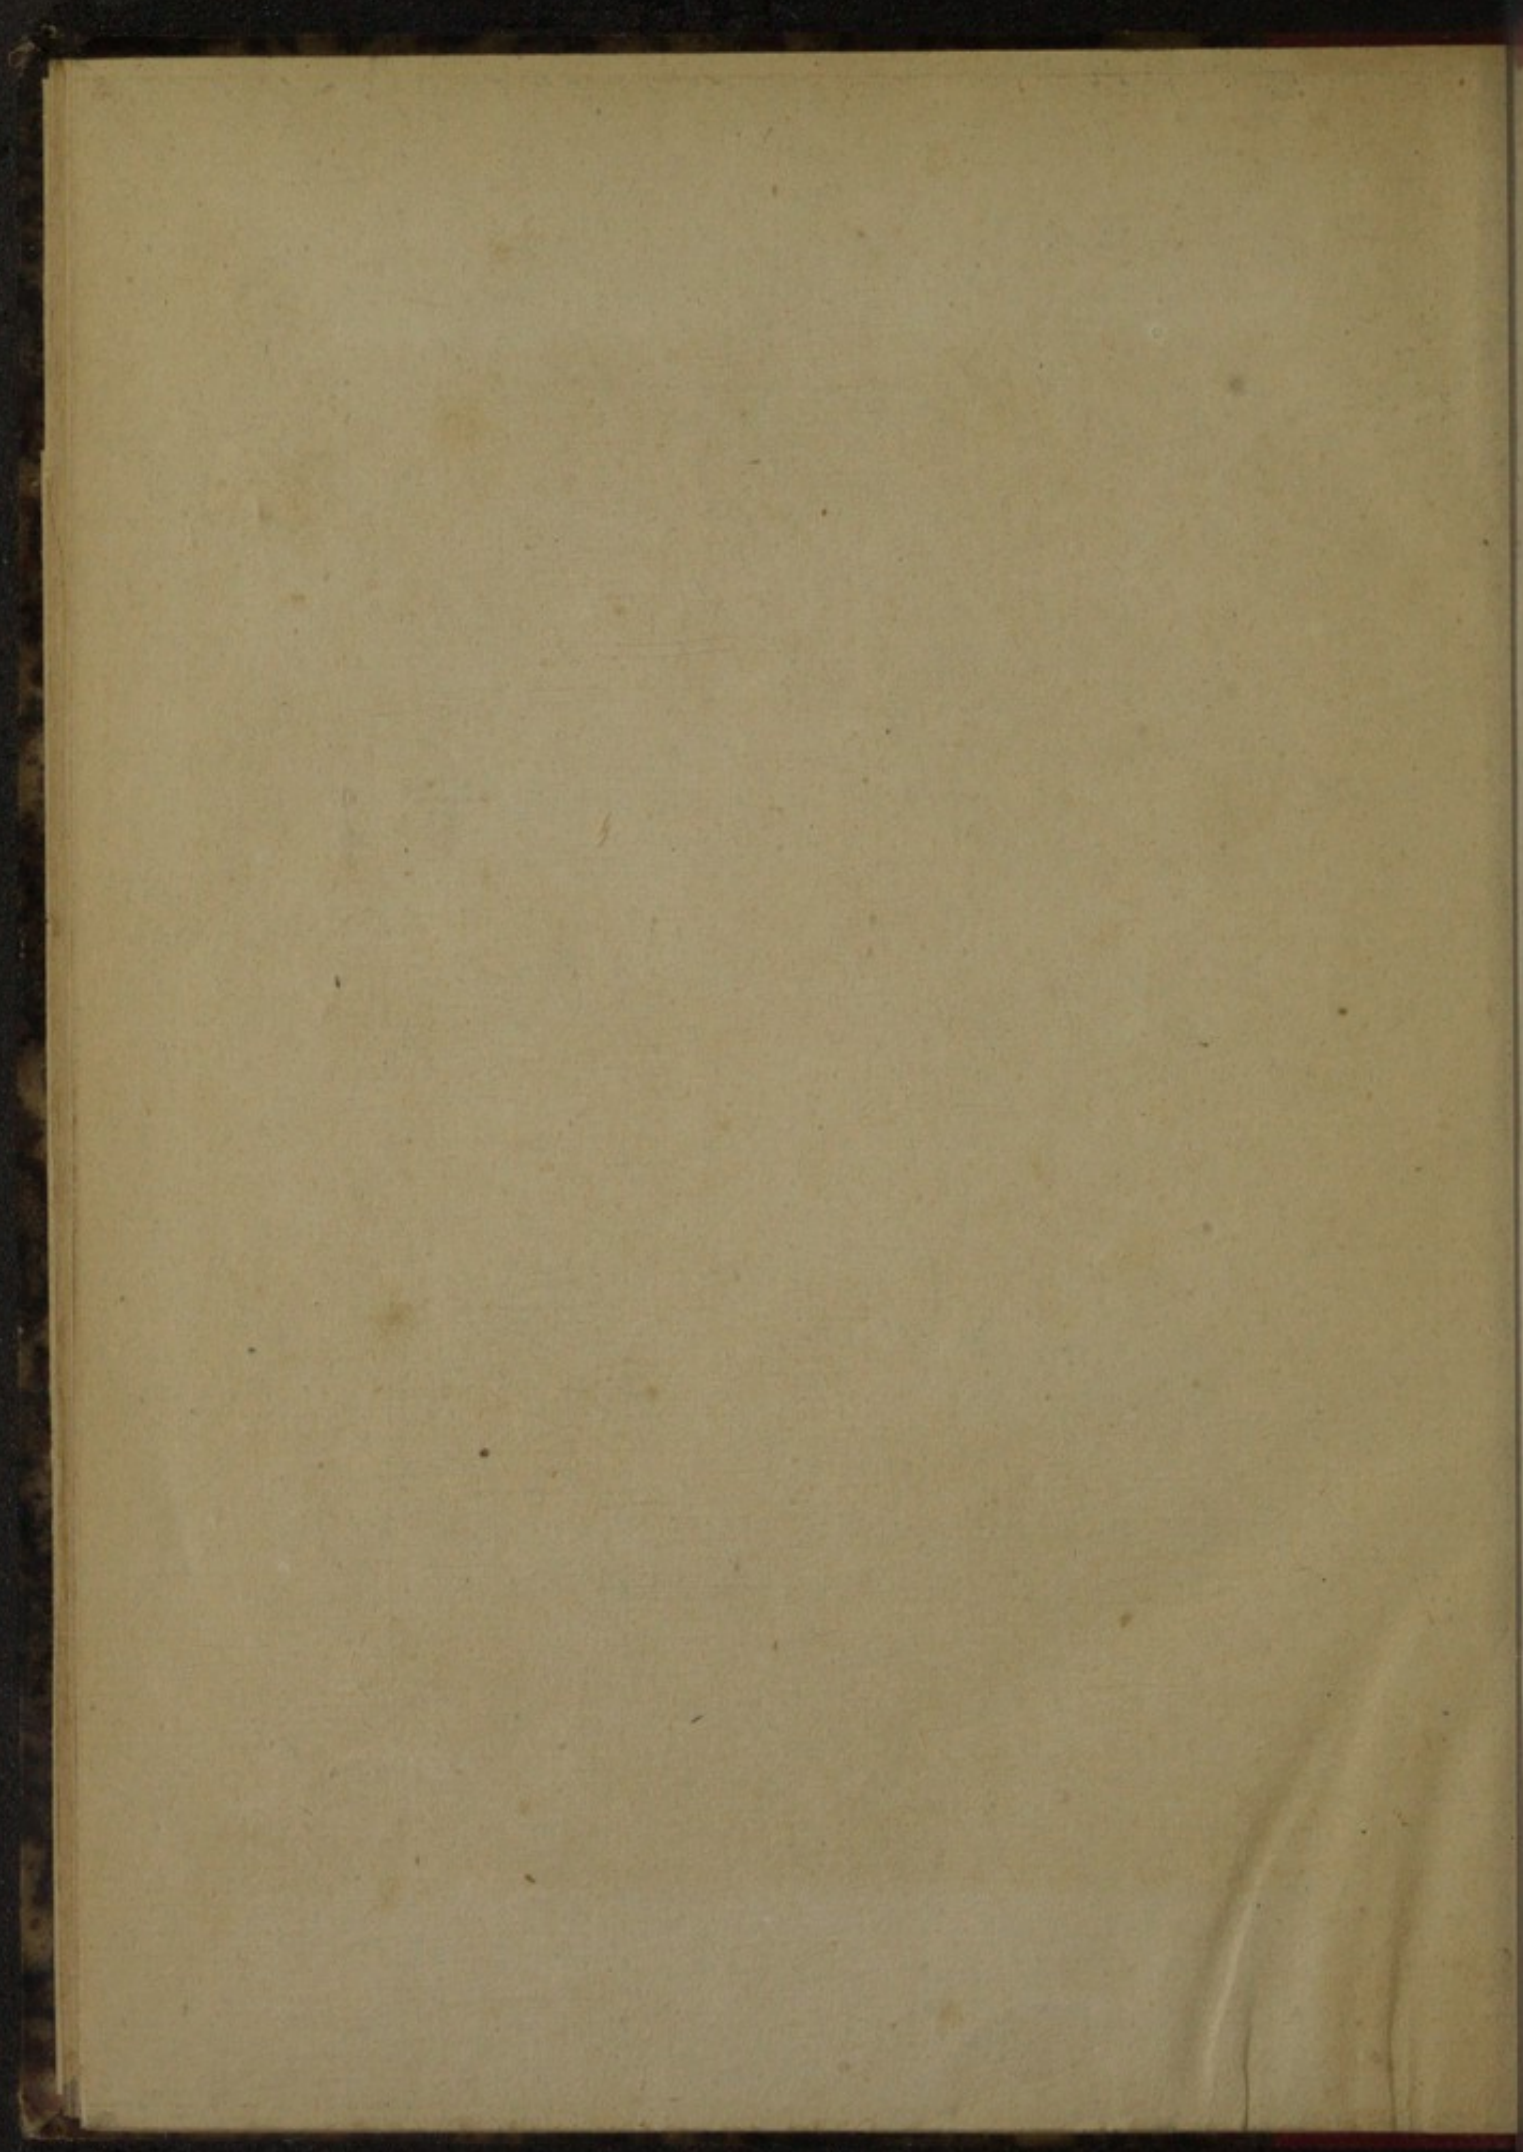

Ammonis cornu fragmentum cristatum, cui adnatī  
globuli pyritæ, duabus figuris ambæ facies exprimuntur.

n° 52.

Panther de aquis medicatis.
