A full range of our instruments
are held in stock at
JOHN BELL & CROYDEN
Wigmora Street, W.1

Dear Sir,

Knives, Scalpels, Lancets - instruments in daily and unceasing use, instruments in which the hall mark of quality is most easily distinguished, instruments which must always be in perfect condition.

We have much pleasure in sending another of our brochures, in which you will find full details of the standard range of Knives, Scalpels and Lancets which we carry in stock for the convenience of our customers. From our past letters we know that you will appreciate how happy we shall be to make any of these instruments specially for you, should you desire patterns other than those illustrated in our brochure.

Having regard to the increasing application of microscopy to veterinary diagnosis we are preparing a brochure dealing with Microscopes and Centrifuges, both hand and electric, and all the necessary accessories. This brochure will be sent to you as soon as possible but should you, meanwhile, require any information on these instruments, please write to us; it will be our pleasure to send you full details.

At your service always,

Yours faithfully,
ARNOLD & SONS.

Manager.
