DIRECTIONS.

To be Well Shaken before Using.

For CUTS, BRUISES, STABS, Etc.—Clean out the wound; then shake the bottle and apply the Oils to the injured parts and rub them in all round, twice a day.

For SPRAINS, TUMOURS, SWELLINGS, Etc.—These Oils should be frequently rubbed in with the hand for some time, and if the swelling will not yield to rubbing, it should be opened with a lancet, and a tent of tow, dipped in the Oils, applied once a day.

For WOUNDS.—Bathe with warm water, twice a day; find the bottom of the wound, and apply the Oils, keeping the mouth open to prevent it healing falsely.

For FLY GALLS and SORE HEADS in SHEEP.—Dress the sore lightly, with the Oils; which keeps off the Fly, cures the wound, and quickly restores the wool.

BAKER'S PURIFIED DRIFFIELD OILS,

For Preventing GANGRENE,
or MORTIFICATION
after LAMBING or CALVING

*and for wounds in Horses, Cattle, Calves,
Sheep and Lambs, such as Tumours,
Hard Swellings, Sprains, Strains, Bro-
ken Knees, Sore Shoulders, Saddle
Crushes, Cracked Heels, Kicks, Cuts,
Bruises, Sore Teats, Fly Galls and Sore
Heads in Sheep, and External Inflam-
mation of all kinds.*

DIRECTIONS.

To be Well Shaken before Using.

For Preventing GANGRENE
or MORTIFICATION after
LAMBING or CALVING.

EWES AFTER LAMBING.—One large table-spoonful to be mixed with the same quantity of new Milk, or Linseed or Sweet Oil, and poured into the wound, and the hinder part held up for a minute or two. When the Ewe requires assistance the Shepherd should anoint his hand and arm well before introducing it.

COWS THAT REQUIRE ASSISTANCE IN CALVING.—Well anoint the hand and arm, which prevents heaving, etc.

EWES' AND COWS' UDDERS WHEN INFLAMED OR BROKEN.—Bathe and apply the Oils.
