EARLY WEANING

- CUTS LABOUR
- CHEAPENS REARING
- SAVES TIME
- QUICKENS GROWTH RATE

CALFWENA PENCILS are a highly palatable high, energy ration and can be introduced at 4 days of age so that they completely replace liquid feeding by the 35th day.

REARING PENCILS if fed from 14 weeks with some hay, succulents, or cereals, meet the high nutritional requirements of young cattle during the growing stage.
