CUPISS' LAXATIVE BALLS

(a purgative and diuretic ball for horses)

As prepared by the late Francis Cupiss, M.R.C.V.S., Diss.

DIRECTIONS

When giving a Ball, if hard, hold in the hand before a fire till soft.

The Ball may be given in the usual manner or it may be ground into a powder and mixed with fluid or given as a drench.

THE BALLS WILL NOT DISSOLVE.

In cases of Scouring the animal should be kept from water as much as possible and have gruel instead.

Pay particular attention to this:—In 24 hours after giving the Ball it is most likely that langour or loathing of food will ensue; this is a desirable effect, and acts beneficially upon the system; the horse should now have all the water he will drink (which need not be chilled except in very cold weather) and be walked out for an hour, and if during this exercise the purgative effect is not so much as desired, give him a briskish canter till it is produced.

The Balls will keep any length of time in a cool, dry place.

DOSES

Large Cart Horse - - - - Ball-and-a-half.

Ordinary Horse - - - - One Ball.

Small Horse or Yearling - Two-thirds-of-a-Ball.

Small Pony or Foal - - - Half-a-Ball.

When the Horse is much out of condition
the dose should be slightly decreased.

Manufactured by - Francis Cupiss, Ltd.

The Wilderness, Diss, Norfolk, England.
