# FLUKE CAPSULES

*For the Treatment of*  
**LIVER ROT or FLUKE  
IN SHEEP.**

---

## DIRECTIONS.

One capsule to be given to each sheep on the morning following an overnight fast.

The best method is to place the sheep on its haunches, hold its head up, open the mouth, take the capsule in the first two fingers and push it down the throat as far as possible, gently close the mouth and hold it tightly shut until you are certain the capsule has been swallowed.

Repeat the dose once a month during the season.

The sheep should be kept in the fold for several hours afterwards.
