Introducing the new Panacur 7-day wormer.

Great news whether you're a home mixer, or buy compound feed.

Panacur now comes as a 7-day dose, for even simpler worming.

So you've a worming programme that fits in naturally with your weekly system on the farm.

For sows, all you do is make certain Panacur is included in-feed for one week every six months.

(There's also a version for worming growing pigs.)

Unlike longer dosing regimes, the 7-day dose is easy to remember and easy to record - it's 1 pack to 1 tonne of feed.

You need fewer production runs and less medicated feed, saving time and money.

Panacur 7-day is also designed to help you meet the complexities of medicated feed legislation.

You can be confident your pigs will readily accept feed containing Panacur: it's odourless and tasteless.

And there are no dietary restrictions before or after treatment.

Of course you can rely on Panacur's effectiveness. It covers all major roundworm types - adult worms, eggs and migrating larvae - and kills worms quickly.

Worming helps ensure your product quality; now Panacur ensures worming is really easy.

Ask your usual animal health supplier or feed compounder for Panacur 7-day - today.

Further information available on request.

Hoechst Animal Health, A Division of Hoechst UK Limited, Walton Manor, Walton, Milton Keynes, Bucks, MK7 7AJ.
Panacur 7-day is an Intermediate Premix of Panacur 4% Powder. **Active ingredient:** fenbendazole. Suitable for gilts, sows, growing pigs and boars.
