**Fowl Specific,
Egg Producer,
Poultry Pills.
and
Gape Powder.**

are preparations no
breeder of Poultry
and Fowls can afford
to be without, if the
best results are to be
obtained

Gape Powder.

For  **and**
Poultry **Fowls**

DIRECTIONS FOR USE

Place the bird or birds requiring treatment under a box with a saucer half full of the gape powder. Blow on the Powder with a pair of bellows so that the atmosphere inside the box is full of it and the birds are obliged to inhale it. After doing this keep the box down for about ten minutes. In the case of birds at the point of death two minutes will suffice at a time but the process may be repeated frequently. Care must be taken to burn the parasites coughed out and the bodies of any birds which may succumb to the disease.

**Especially valuable for
dispelling gapes in young
Turkeys as well as Chickens**

**A very good preventive
is to sprinkle a small
quantity in their nests**

**The powder should be
used as directed
directly gapes makes
its appearance.**

**It is important to keep
the lid of the tin on when
not actually in use and
store in a dry place ex-
posure to the air will
cause evaporation.**
