This invaluable powder has the most marked and wonderful results upon the egg producing organs of all kinds of poultry, so that a large and constant supply of eggs is easily obtainable however disappointing results may have proved before.

At the same time the improvement in the general health and appearance of poultry owing to increased appetite and glossy plumage is greatly esteemed by all who fatten birds for the table, or take a pride in seeing their poultry, always in show condition.

EGG PRODUCING. A STIMULATING TONIC.

POULTRY POWDER.

Directions for Use.

Add one heaped teaspoonful of the Powder to sufficient Barley Meal to make the morning feed for 12 fowls afterwards making the mixture into a stiff paste with boiling water. During the winter or in cold or wet weather this is recommended to be used daily, reducing to every other day or twice a week, according as the weather becomes milder and eggs more plentiful.

To bring young Chicks, Turkeys &c., on to the best advantage this powder should be used daily, it will build up the whole system and prevent diseases.
