PHEASANT REARING.

Gamekeepers please read.

Every year sees a rapidly-increasing sale of our Meal and "Crissel," which warrants us in saying that it has now been proved, beyond doubt, that the use of highly stimulating Foods in rearing young Pheasants is very injurious. The rapid and unnatural growth they at first cause soon results in premature decline.

No such result can ever happen when our Meal and "Crissel" are used, as they are, when combined, a perfectly natural food, containing all the elements of nutrition. The Meal being thoroughly cooked, is most easily digested, even by the youngest and most delicate Birds. Every kind of spiced and condimented food is highly injurious.

Pheasants and all kinds of Game can be reared from the shell on our Meal and "Crissel," no other food need be used, the "Crissel" taking the place of insect life, and giving all the warmth that is necessary.

Of all our Agents, in 7lb., 14lb., 28lb., 56lb., or cwt. original Bags, stamped with our name and Trade Mark, and the price includes the Bag.

*** Be especially careful when purchasing to see you are supplied with our Meal, or a cheap inferior article may be substituted, for the sake of the extra profit the trader derives by selling it.

SAMPLES POST FREE.
