BOB MARTIN'S tasteless CONDITION POWDERS cure:

Continual Scratching and Loose Coat. Give a ten days course of three powders daily.

Loss of Appetite and Listlessness. Give a three days course of three powders daily.

Eczema. Diet carefully and give a twenty-one days course of three powders daily.

Eczema-Gout (Swellings between the toes). Bathe the paws in a solution of Bob Martin's Foot Powder and water, then dry and smear with '92 Ointment. Give twenty-one days course of three Bob Martin's a day.

In each case, after the cure is completed, Regular Conditioning should be maintained daily.

IN WARTIME the companionship of a good dog is more valuable than ever.

"Only healthy dogs make good companions, and I want you to get the best results as you use, and come to rely on, Bob Martin's Condition Powders for YOUR dog. Please read this leaflet carefully, for it contains many valuable suggestions."

Bob Martin

Many years of veterinary research have revealed that every dog needs regular conditioning to keep him fit. In other words, conditioning is the necessary substitute for the natural advantages which a dog has sacrificed in giving up his wild life to become "the friend of man."

REGULAR

conditioning with **BOB MARTIN'S** means better health, better coat, better spirits

AS a member of your household, your dog leads a comparatively restricted life. He eats prepared foods which are not his natural diet, and which cause impurities to accumulate in his blood-stream. Pure blood is the foundation of every dog's health and fitness. Every organ of the body depends upon the purity of the bloodstream for its correct functioning, but because a dog's skin is non-porous, he cannot expel blood impurities by perspiring, nor can he avail himself of Nature's blood correctives, found in rare wild grasses and herbs, for these are now beyond his reach.

A DOG'S SKIN IS NON-POROUS.

This reproduction of a photomicrograph shows the ducts in human skin by which impurities pass out from the glands to the surface (a).

In a dog's skin (b) there are no ducts, therefore the impurities of the blood cannot be perspired away.

Your dog depends on you to keep him fit by being provided regularly with Bob Martin's Condition Powders. By conditioning him in this simple, *natural* way, you protect him against such common blood disorders as scratching, listlessness, loss of appetite and eczema. A regularly conditioned dog will have lasting fitness, a happy temperament, and will become a life-time friend and companion.

WHAT BOB MARTIN'S DO.

In addition to the natural blood correctives, so essential to every dog's health, Bob Martin's Condition Powders contain the vital substances which are necessary for the *maintenance* of a pure, rich bloodstream.

Replacing Used-up Constituents of the Blood.

In the course of the normal activity of the organs of the body, certain constituents of the blood are continuously being used up, and must be renewed. This constant renewal is effected by the daily transference of certain vitally important substances from the cells of the body to the bloodstream. And it is essential that, in their turn, these substances should be replaced daily.

Bob Martin's Condition Powders contain these vital elements in the balanced proportions which Nature demands, and in exactly calculated quantities to ensure an adequate intake by your dog. The powders are specially prepared so that they can be easily absorbed into a dog's system.

WHY "ONE A DAY."

It will, therefore, be seen why the greatest authorities on dogs recommend regular conditioning. "One Bob Martin's

once a day" is the method which they endorse. This simple routine will provide your dog with those vital elements which are necessary to maintain a constant supply of pure, rich blood—the foundation of fitness for every dog. Nearly half a century of experience has proved that regular conditioning with Bob Martin's is a scientific principle of the utmost value in promoting canine well-being.

HOW TO GIVE THE POWDERS.

Bob Martin's Condition Powders are prepared in a tasteless form, and may be mixed with a little milk, sprinkled over the dog's food, or dropped dry on his tongue. This inexpensive rule of health will speedily raise your dog to a new level of fitness, and his coat will acquire that healthy "bloom" which distinguishes the dog in condition.

MADE IN THREE STRENGTHS.

Bob Martin's Condition Powders are safe and are particularly beneficial to bitches in whelp, and to delicate dogs and puppies.

Large: for large dogs over 30 lbs. in weight.

Medium: for dogs between 8 lbs. and 30 lbs. in weight.

Small: for toy dogs under 8 lbs. and puppies.
