SAVORY & MOORE'S

THE VITAMIN VETERINARY FOOD

TO maintain the highest possible standard of health amongst stock, animals or birds, is the first thought of every stock-breeder. Losses due to ill health, disease or weakness can be reduced to a minimum.

VITAVET is a scientific food containing Vitamins A, B & D with Liver Extract and bone forming Mineral Salts. VITAVET answers all the requirements of a complete accessory food. It contains Vitamins essential to healthy body growth, Mineral Salts which have been found essential for the maximum growth and bone development. Liver Extract which has the effect of promoting the formation of red blood corpuscles.

VITAVET strengthens animal resistance to disease and to climatic conditions, whilst in fur bearing animals the prime condition which is the result of using VITAVET-FOOD regularly greatly enhances the value of the coat.

VITAVET has been used with great success for dogs, cats, silver foxes, pigs, chickens, pigeons, etc.

It is invaluable to the bird fancier and stockbreeder alike. For all animals which must perforce be kept in captivity, under which conditions it is often difficult to maintain the high standard of health essential for show purposes, it cannot be too highly recommended.

Report of experiments on large cage animals such as lions and tigers have conclusively proved its value.

DOSES :

For Young Animals One teaspoonful three times a day is the average dose.
Adult Small Animals One tablespoonful three times a day.
Large Animals From one to two tablespoonfuls three times a day.
Birds or very small animals... The dose may be modified according to discretion.

VITAVET is readily taken by all animals.

May be mixed with food but should not be boiled.

VITAVET is sold in 8 oz. tins at 1/9. 1 lb. tins at 3/-. Special prices for bulk.
