ASTLEY'S
**PREPARED WHEAT
TO POISON**

Mice, Sparrows, and all sorts of small Vermin, without danger to animals of a larger growth.

Agriculturists and Gardeners will find it of the greatest service in effectually preserving their crops from destruction by mice and birds.

It is the most effectual poison that can be used—*because* it generally kills on the spot.

It is the cheapest poison—*because*, for a few pence you may poison a thousand.

It is the easiest poison—*because*, you require no trap or bait, it is a bait itself.

It is the safest poison—*because*, it may be laid about without fear or danger to human life.

DIRECTIONS.—

For mice, lay it in small heaps a short distance from their holes.

For sparrows, &c., lay it along the places where they congregate last thing at night or early in the morning, in a short time hundreds will be found dead.

Prepared and Sold in Packets of 1d., 2d., 4d., and 6d

BY

**J. ASTLEY,
CHEMIST, COVENTRY.**
