margins, and outer surface of that bone
 2. To the posterior extremity of the fifth metatarsal bone
 18 Peroneus brevis attach to the middle of the anterior and posterior margins, to the inferior part of the outer surface of the fibula and to the aponeurosis 2. to 5th metatarsal

11 Peroneus tertius or anterior attach 1^o to the lower portion of the inner surface of the fibula to the subosseous ligament and to the aponeurosis
 2^o to the posterior extremity of the fifth metatarsal bone
 12 Long forming extensor 1 to outer protuberance of tibia & to the anterior half of the inner surface of the fibula and to the subosseous ligament

2 to the interosseous ligaments of the 4 last toes
 15 Pedisus attach 1 to calcaneum 2 to the 4 first toes
 14 Adductor of little toe Attach 1 to calcaneum 2 to the posterior extremity of little toe

1 Gluteus medius Attach 1 to ischial spine between the curved lines and to the iliac crest, to the anterior and superior spine, and to the notch separating it from the superior to the aponeurosis fascia lata
 2 To the external aspect of great trochanter
 2 Gluteus maximus 1. to the upper curved line of the iliac bone as far as the crest to the lateral margin of this bone and of the crest to ligament 2 to the aponeurosis of the thigh
 3 To the rugosities of the femur, springing from the great trochanter to the linea aspera
 5 Rectus cruris at 1 to anterior and superior spine of ilium & to junction of line above the lesser cavity 2 to anterior protuberance of tibia

3 Vastus externus attach 1 to trochanter 2 to the line anterior to this eminence 3 with the Rectus cruris to anterior tuberosity around the knee
 Biceps attach 1 to sciotic tuberosity by one portion from the linea aspera by the other
 4 & 5 Femur muscles of the aponeurosis attach 1 to superior spine of tibia to and 2 to the aponeurosis called fascia lata which is dead

6 Semitendinosus attached to the external part of the anterior tuberosity of tibia
 8 Gracilis to the anterior half of the iliac crest and to the external edge of the abdominal aponeurosis 2 to outer surface and superior margin of the last 7 or 8 ribs
 6 Tibialis anterior attach 1 to outer protuberance of tibia

and to the line running to anterior protuberance to upper 3/4 of external surface of bone to the interosseous ligament 2 to the tubercle of the first cuneiform 2 to the first metatarsal
 7 Gastrocnemius attach 1 to the rough impression above the condyles of femur to calcaneum by tendo achillis

4 behind the femur anterior 2 to the tuberosity of the foot of the 2. phalanx and to
 13 Long extensor of great toe and 1 tendon of the inner surface of the fibula somewhat to the interosseous ligament
 8 Soleus to back part of head of fibula to the outer edge of the posterior surface of the bone to the middle portion of the inner edge of which to the aponeurosis 2 to the calcaneum by the tendo achillis
 Peroneus longus 1. To the head external tuberosity of tibia to the outer surface of head of fibula to the anterior and posterior surfaces margins
