SEE OUR NEW CATALOGUE ON THE INTERNET

IN THE INNOVATION DOME
Take a glimpse into the future. See Millipore on the worldwide Internet. On show will be our international catalogue which is packed full of product specifications and details.

Browse through our latest product news. Spend a little time surfing through our most recent newsletters. Also available on screen will be a selection of really useful filtration protocols.

See it all for yourself in the Innovation Dome - it's worth looking into!

PLUS: ANSWER 3 QUESTIONS

And win a superb Millipore Golf Umbrella. As a bit of fun, we're holding a simple quiz. Answer three questions correctly and your name will be put into our daily draw for one of these superb prizes.

If you are unable to visit our stand then please call our Technical Service Specialists on:

NEWNEW ANTEL A-10 ORGANICS MONITOR

IONIC PURITY IS ONLY HALF THE STORY

When it's vital that water is absolutely pure, Millipore's new Anatel A-10 Organics Monitor is the ultimate reassurance you need. Most pure water systems measure water quality by resistivity (Megohm.cm) but this shows only ionic purity. With the A-10 connected to your pure water system you can now instantly show the level of organics too! Come and see for yourself the difference it can make.

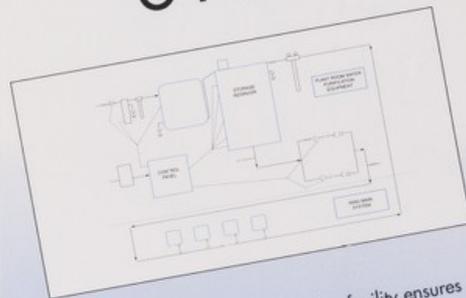

NEWNEW ELIMINATE NUCLEIC ACID AND PROTEIN CONTAMINATION

ELIMINATE NUCLEIC ACID AND PROTEIN CONTAMINATION.

If you're involved in molecular biology, cell culture, IVF or electrophoresis, you must see Millipore's new Milli-Q PF plus pure water system. An extra 5000MW ultrafilter removes the proteins, enzymes and organics > 5000D that can cause so many problems in such critical applications. Also, ask our specialists about the study completed by molecular biology researchers and why they now use a Milli-Q PF system.

NEWNEW CENTRAL DESIGN SYSTEMS

Our central water purification design facility ensures that tailor-made systems are available for both large and small sites. If you have need of a centralised source of pure water, then visit our stand and see examples of custom designed facilities for 2/3 workstations up to those purpose built to serve around 500 scientists.
