Free gifts just for buying filters. And it's easy!

With the Waters Edge Frequent Buyer Programme, you can earn points with every purchase of Gelman Sciences Filtration products from Waters, which you can then redeem for products, services and merchandise found in the Waters Edge Frequent Buyer brochure. The points are automatically sent with the Gelman Sciences products from Waters. You just collect the points and redeem them for the items of your choice.

For the more serious minded, there are Waters training courses and Waters chromatography products or literature.

For the not-so-serious minded, there is a wide selection of t-shirts, coffee mugs, pens, stress balls, wall clocks and much more.

Visit us on the Internet at <http://www.waters.com>

Get more filter for your money

Gelman Sciences Filters from Waters set the standard for HPLC filtration with innovative products such as:

- **Minispike Acrodisc® Syringe Filters:** These filters feature a smaller outlet than conventional syringe filters, allowing for easy dispensing into autosampler vials.
- **GHP Acrodisc Syringe Filters:** This versatile hydrophilic polypropylene membrane syringe filter can be used with aqueous and aggressive organic-based solutions. It also exhibits low-protein binding, making the GHP Acrodisc syringe filter the choice for all your applications.
- **Acrodisc GF Syringe Filters:** These incorporate a 1.0 µm glass fibre media layered over a 0.45 µm membrane, which allows you to filter viscous and particulate-laden samples in one step. The GF version is available in GHP and Nylon Acrodisc syringe filters.

The best filtration products and lots of free stuff give you an edge. We call it the Waters Edge.
