A CHOICE OF PLATE WASHERS

FROM YOUR CHOICE
IN PLATE READERS

Molecular Devices the world's number 1 choice for Microplate Readers now offers the world's number 1 choice of Microplate Washers

Following the acquisition of SKATRON we can now answer all your microplate washing needs

The Skatron product range offers dedicated washers for 96-, 384- and 1536- well microplate formats. The 384- and 1536-EMBLA systems offer Windows based software running on external PC's, robotic integration and separate heads for dispensing and aspiration, to provide accurate and reproducible results.

SkanWash 300 and 400 Two Automatic 96 well Microplate Washers

Reliable, easy to use and able to accommodate a wide range of available plates. On board processor enables a variety of wash programs to be used.

EMBLA 384 Automatic Microplate Washer

The first commercially available 384 well washer complete with Windows based controlling software that can download wash protocols to the washer. Also available as the EMBLA 384 Cell Washer - capable of working with most cell lines.

EMBLA 1536 Automatic Microplate Washer

The world's first washer for 1536 well plates maximises throughput while reducing the cost of screening. Like the EMBLA 384 it features the same external PC software giving a huge variety of wash options.

Choose SKATRON Washers today for success tomorrow

Skatron Microplate Well Washers

For the widest range of applications:

- High Throughput Screening (HTS)
- Clinical Research
- Immunoassays
- Assay miniaturisation
- Drug Discovery
- Combinatorial Chemistry
- Lab Automation
- Membrane Assays
- Competitive Binding Assays
- Cellular Assays

Make the right choice...complete and return the reply card now.
