EXTEND MULTICHANNEL

VOLUME	CODE
5-50 µl	P1990
50-300 µl	P1995

Each EXTEND pipette is calibrated using a computer-controlled microbalance. They are subsequently maintained within a permitted tolerance range specific for each model, thus providing the sort of reliability needed by today's busy laboratory.

All EXTEND pipettes are covered by a calibration warranty certificate vouching for its accuracy, precision and quality finish.

DIGITAL PIPETTES

EXTEND digital micropipettes provide your laboratory with maximum accuracy and precision when taking-up and dispensing fluids.

The range consists of twelve fixed-volume and five adjustable volume pipettes.

Each is characterised by:

- High versatility
- Easy calibration
- In-built tip ejectors

EXTEND pipettes use only the finest materials, each chosen for its durability and integral strength.

MULTICHANNEL PIPETTES

An eight-channel micropipette for the accurate take-up and dispensing of precise volumes based on the principle of air displacement – ideal for microtitration plates.

Fitted with conventional disposable tips, two models are available covering a volume range of 5 to 300µl. Both include:

- Ergonomic design for ease of use
- 9mm clearance for microplates
- Two tip ejection systems

As for the digital range, both multichannel pipettes use only the highest quality materials.

TWO YEAR WARRANTY

Every EXTEND pipette – digital or multichannel – is covered by a two year warranty which guarantees a complete replacement service within 24 hours (weekends and public holidays excluded) should any problems arise during this period.

A free pipette recalibration service during the first twelve months from purchase is also provided. This ensures that the pipettes continue to perform accurately.
