Dear Mr Lowther

Sonics & Materials Ultrasonic Processors

Your enquiry about the above equipment made through International Biotechnology Laboratory Journal, has been referred to us as the sole UK distributor of Sonics & Materials products.

We have pleasure in enclosing a brochure which will provide you with full details of the Vibra-Cell range of ultrasonic processors and accessories.

The Vibra-Cell is the most sophisticated, high intensity ultrasonic processor available, offering great versatility in a variety of applications in many scientific disciplines. Automatic frequency control circuitry eliminates the need for constant adjustment, and automatic amplitude compensation ensures uniform probe tip excursion, independent of varying load conditions.

All Vibra-Cell power supplies and converters are protected by a full **3 years parts and labour warranty.**

Our local Representative will contact you soon to discuss the equipment in more detail and assist in the selection of an appropriate model for your particular application. Meanwhile, if you have any queries or need any additional information please contact me on the above telephone number.

Yours sincerely
JENCONS (Scientific) LIMITED
