New microplate system reads fluorescence *and* absorbance

Develop, optimize, and apply fluorescence and absorbance microplate assays on just one system. The new Biolumin™ 960 micro assay reader combines fluorescence and absorbance detection with superior sensitivity for start-to-finish project compatibility.

Commercial reagents are available including Biotrak™ assays and fluorescent CyDye™ kits from Amersham Life Science. Assays are faithfully replicated as your project moves on to high throughput labs—because BioLumin 960 has the capabilities and features to keep pace.

Send in this card for your free BioLumin 960 brochure.
