PerSeptive Biosystems

Molecular  
Probes

# Results

Your **research** is too important to leave to **chance**.

You need definitive **results** — quickly and easily.

Count on reproducible **results** with the leaders in **fluorescence** technology: Molecular Probes and PerSeptive Biosystems.

Technology that's reliable and sensitive. Creative potential to expand the reach of your research. Instrumentation and assay kits offering the highest measures of reproducibility.

## Reproduce Your Results

Fluorescent Reagents  
from Molecular Probes &

CytoFluor® Series 4000  
Multi-Well Fluorescence Plate Reader  
from PerSeptive Biosystems

LIVE/DEAD® Viability Kits. One-step assay for differential staining of live and dead cells.

PicoGreen® dsDNA Quantitation Reagent.  
The most sensitive method for measuring DNA concentrations.

At the risk of  
repeating ourselves...

**Your research is too important to leave to chance.**

You need definitive **results** — quickly and easily.

Count on reproducible **results** with the leaders in **fluorescence** technology: Molecular Probes and PerSeptive Biosystems.

Technology that's reliable and sensitive. Creative potential to expand the reach of your research. Instrumentation and assay kits offering the highest measures of reproducibility.

## Molecular Probes Bright on the Mark

The world's premier supplier of **fluorescent** products, Molecular Probes offers a wide array of reagents for microplate-based research. Here are just a few of the reagents and kits available for biological assays:

**PicoGreen® dsDNA Quantitation Reagent** — Quantitate as little as 50 pg dsDNA in a 200 µL assay volume.

**CBQCA Protein Quantitation Kit** — Quantitate between 10 ng and 150 µg protein in a 200 µL assay volume.

**CyQUANT® Cell Proliferation Assay Kit** — Monitor cell proliferation in a sensitive single-step procedure that allows quantitation of 50 to 50,000 cells in a 200 µL assay volume.

**LIVE/DEAD® Viability Kits** — Rapidly assess viability in bacterial and eukaryotic cells.

**EnzChek® Protease Assay Kits** — Detect proteases by continuous assay, with no separation steps required.

## PerSeptive Biosystems Get a Better Read

### CytoFluor® Series 4000 Multi-Well Fluorescence Plate Reader

CytoFluor Series 4000 Multi-Well Fluorescence Plate Reader. Highly accurate, repeatable results.

With proven leadership in **fluorescence** technology, CytoFluor Series 4000 offers unmatched precision and flexibility. Demanding standards of reproducibility support every assay — each instrument is delivered with a certificate of initial quality (IQ).

#### Enhanced flexibility features:

- Temperature control — from +5°C to 45°C.
- Kinetics software — initial rates, slopes and more.
- Unique fiber-optic options — largest range for optimal sensitivity.
- Flexible read options — 6, 12, 24, 48, 96 and 384-well plates and a scanning mode.

### Read all about it.

**Fax** a copy of the attached card for more information, and you'll receive a **FREE** Fluorescence Microplate Assay Guide, a great tool for enhancing lab productivity.

**YES** Send me my FREE Fluorescence Microplate Assay Guide and more information on getting results with Molecular Probes' Fluorescent Reagents and PerSeptive Biosystems' CytoFluor Series 4000 Multi-Well Fluorescence Plate Reader.

**Copy and Fax This FREE Guide.**
