A BOLD NEW

DIRECTION

in

HPLC

Alliance – a Bold New Direction in HPLC...

Time for Change

Alliance differs from conventional HPLC in several important areas. And it is these differences that help

Alliance give you more confidence in your results than any other HPLC system before it. They make Alliance easier to use and maintain. More compact, more flexible. And more reliable.

Alliance **is not** an established pump or autosampler in a new box.

Alliance **is not** a mixture of existing products put together in a 'different' way.

Alliance **is not** a 're-engineered' HPLC.

Alliance will improve your chromatography from analytical to 1mm columns and will allow you to choose any detector you need for your application. In short, Alliance will allow you to improve your chromatography without compromise.

Come to a seminar held near you where we will give a short presentation, telling you how Alliance can change chromatography

in your laboratory.

The outline agenda for each morning is as follows:

10.00 Registration and coffee

10.30 • Alliance: New designs and concepts in HPLC

• Advanced spectral analysis – further developments in photodiode array technology

• Display and discussion of Alliance systems capabilities

12.30 Buffet lunch

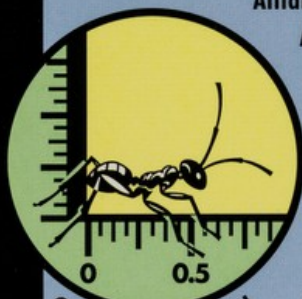

Attendance is free of charge, refreshments and a buffet lunch will be available. To reserve your place simply indicate which venue you would like to attend on the reply card and return to Waters. Alternatively you may fax Kim Walsh on 01923 219012 or phone on 01923 816700.

VENUES

Monday 13 May	Headingley Cricket Club, Leeds
Tuesday 14 May	Old Trafford Football Club, Manchester
Wednesday 15 May	Aston Villa Football Club, Birmingham
Thursday 16 May	Chepstow Race Course
Friday 17 May	Sandown Race Course, Surrey
Monday 20 May	Murrayfield RFC, Edinburgh
Tuesday 21 May	Europa Hotel, Belfast
Wednesday 22 May	Burlington Hotel, Dublin
Thursday 23 May	Jury's Hotel, Cork
Friday 24 May	Briggens House Hotel, Ware

The newly designed solvent delivery system incorporates independently-driven pistons, serial flow and dual pressure transducer feedback loop to both, precise isocratic and gradient operation.

For years, companies have taken the same approach to HPLC, using equipment that has remained fundamentally unchanged.

This explains the prevailing attitude that the limits of performance, accuracy and reliability have basically been reached.

Today, Waters challenges that attitude and sends HPLC in a bold new direction. A direction inspired by fresh perspective and innovative technology. It is grounded in a thirty year dedication to HPLC excellence.

Introducing the Alliance line of HPLC systems.
