Apparently the wrestlers haven't heard about our free Symmetry® t-shirt offer. (See inside for details.)

ROYAL MAIL
POSTAGE PAID
HQ 5963
GREAT BRITAIN

Since some things are challenging to separate...

Available in 3 sizes:
S WAT049102 (Great for children)
L WAT049101
XL WAT049100
(When ordering, please include part number of t-shirt.)
No returns. One t-shirt per Symmetry® column.

For a limited time,
get a free t-shirt
with your purchase of
a Symmetry® column.

Waters

1. Please send me more information on Symmetry® columns.
2. Please send me your new Waters Chromatography Columns and Supplies Catalogue as soon as it is available.
3. Please send me your technical newsletter – The Waters Column.

Please delete my name from your mailing list.

...we're providing you with more leverage.

Because we've all wrestled with difficult separations, Waters has developed the additional leverage you need to avoid changing column brands to get alternative selectivity.

Designed for the pharmaceutical method development chemist who wants a column with alternative selectivity, SymmetryShield™ RP₈ is a new reversed-phase HPLC column that provides a silica surface which sets a new standard for base deactivation. Unlike YMC, Intersil® or Zorbax®, SymmetryShield RP₈ employs a patented technology that significantly reduces the activity of the silica surface with acidic and basic compounds resulting in great improvements in peak shape and resolution.

Improved Peak Shape and Resolution

To deliver this selectivity difference, Waters started with the highly inert Symmetry® silica that has been widely proven in the Symmetry® family. We then added a unique reversed-phase ligand with an internal polar carbamate functional group. This patented chemistry literally shields the silanols from the acidic and basic compounds. The result can be significantly different selectivity with improvements in peak shape and resolution, even for the most challenging separations.

Batch-to-Batch Reproducibility

SymmetryShield™ RP₈ also delivers the same batch-to-batch reproducibility that has made the Symmetry® family the standard for the next generation of HPLC drug assays.

Every compound is different. Every separation is a new challenge. Now, with SymmetryShield™ RP₈, Waters gives you the leverage you need to meet those difficult challenges.

If you have a difficult separation and can't get the results you need, try a new column and a new chemistry all-in-one, SymmetryShield™ RP₈. For all your separation needs. Order Today!
