One soldier cannot win a battle.
But the result of a battle may
depend on the way in which each
individual soldier does his duty.

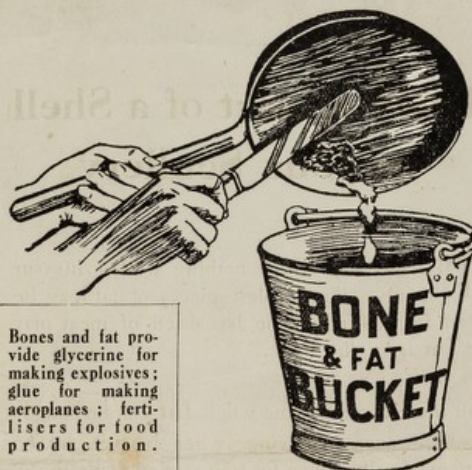

One household cannot supply many
pounds of Bones and Fat. But the
tons that are needed will only be
supplied if each individual home
contributes its share.

That is all you are asked to do. Simply to save
the Bones and Fat that are no longer fit for
kitchen use, and either give them to the Dustman
or *sell them to any Dealer in Bones.*

By doing this you will be backing
up our Soldiers, Sailors, and Airmen
in a really practical way.

Issued by
The Domestic Savings Committee
3 and 4 Water Lane, London, E.C.3
with the approval of
The National Salvage Council
and
The Ministry of Munitions.

Taylor, Garnett, Evans & Co., Ltd., Printers, London, W.C.2, and Manchester.

Bones and fat provide glycerine for making explosives; glue for making aeroplanes; fertilisers for food production.

Save them for Munitions

BONES which can no longer be used even for soup
—Fat which can no longer be used even for
cooking—don't throw them away. Don't burn
them or put them in the dustbin with other rubbish.
Your country needs them. Fat and Bones which are
worthless to you may help to sink German Submarines,
bomb German factories, win battles, save Soldiers'
lives, and bring the peace we all want.

You can sell to the Rag-and-Bone Collector

Start a Bone-Bucket to-day, and tell the Dustman. He
will collect, or, if you prefer, you can sell to the Rag-and
Bone Collector. In either case the Bones and Fat will
go to the Authorities responsible for turning them into
Munitions.

There is part of a Shell in your Scullery

THERE is probably nothing wasted in *your* home. The smallest pieces of fat may be used for cooking. The last shred of meat may be cut from the bone.

But there comes a time when **fat** can no longer be used, even for frying; when **bones** are no longer of value, even for soup. You *must* throw them away then.

But do not burn them or throw them into the dust-bin, where they would be mixed with ashes and rubbish. Start a special Bone-Bucket, and put in it all bones and all fat with which you have finished. Even the scrapings of plates and pots and pans are valuable. They, too, can be made into glycerine, for firing British Bombs and British Shells.

Just think—there is part of a Shell in your Scullery; on the plates that are waiting to be washed up. Part of a Shell—and a very important part—the explosive force that hurls it from the gun.

Lend a Hand at Loading the Guns

EVERY time you fill up the Bone-Bucket you are helping our Batteries to load and fire! For the Glycerine extracted from the Bones and Fat goes to make the Explosive which is used in all our Guns. There is not enough home-produced Glycerine to supply the requirements of the Army and Navy. The Government has to import foreign Glycerine, which costs four times as much as Glycerine made at home, and even so, more Glycerine is urgently needed. By helping to supply it, you are assisting to provide our soldiers and sailors with the munitions on which their very lives may depend. Start your Bone-Bucket to-day.

**18 lbs. of Bones, or 2½ lbs. of Fat
will supply enough propellent explosive
for an Eighteen Pounder Shell.**

Start your Bone-Bucket To-day

Perhaps you may say that it would take you a long time to save 1 lb. of Fat or even 1 lb. of Bones, from the quantity of meat that you are getting. However true that may be, remember that every little helps. Look at it in this way:—
