Information on Organic Produce

All organic produce has been grown using the earth's natural goodness.
The use of artificial fertilisers or pesticides is prohibited.

WHY BUY ORGANIC PRODUCE?

Modern farming techniques damage the environment by causing soil erosion, and harming hedgerows, wild flowers and wildlife.

People are concerned for their health as 98% of UK produce is sprayed with pesticides. The average person consumes one gallon of pesticides each year!

ORGANIC FOOD TASTES BETTER!

Due to the lack of sprays used, the produce grows naturally and tastes better than its conventionally grown counterpart. Natural feeding of the plant results in a better balanced nutrient supply and higher levels of vitamins.

VERIFICATION THAT THE PRODUCE IS INDEED ORGANICALLY GROWN.

Abel & Cole are registered with the Soil Association (no.2043). We buy our produce from certified growers of organic produce which conform to Demeter, Soil Association or United Kingdom Register of Organic Food Standards (U.K.R.O.F.S.) regulations. These are approved by European Council Regulation No 2092/91 (The law on European and UK standards). All the produce we supply can be traced back to the farm on which it was grown.

A WIDER SELECTION

ABEL & COLE work closely with organic farmers to develop a wide variety of crops in confidence that there is a market ready for their organic produce. This means that you can receive a much wider variety of organic produce than is currently available through the major supermarkets.
