THE "CAHIER" NEW SYSTEM OF MASSAGE

PATENT APPLIED FOR

CHARLES CAHIER, S.R.

This unique system of Massage is due to the invention of a special (patent) electric vibratory instrument whereby the vibrations of a tiny but powerful oscillating electric motor strapped to the operator's hand are transmitted through the fingers of the operator to the part under treatment. The lightest massage or a deep penetrating massage may be given at will. The instrument weighs 2 lb. only. No applicators to wear out.

By this method 50 per cent of the fatigue to masseuses, inseparable from the usual manual massage, is avoided and infinitely better results in treatment are obtained.

The instrument has been demonstrated in a number of London hospitals and to leading specialists, and has been warmly praised, and a number of instruments ordered. Owing to the robust nature of the motor the instrument is particularly suitable for heavy service in hospitals.

A series of demonstrations were given by Mr. Charles Cahier, S.R., during the Annual Congress of the Chartered Society at University College from September 19-24, 1932, and created the greatest interest.

The vibratory instrument is self-contained and is supplied with the necessary resistance lamp and 9 ft. of special cable, and can only be obtained from us, at a cost of

£10 10s.

(net professional price)

or £2 12s. 6d. and twelve monthly payments of ~~15s. 6d.~~ *14/1*

SPECIAL OFFER

We shall be pleased to send one of these instruments ~~ON~~ TRIAL for seven days, free of any cost or obligation, to any registered member of the Chartered Society.

THIS APPARATUS IS ONLY FOR PROFESSIONAL USERS AND WILL NOT BE OFFERED TO THE PUBLIC
