The "Power" Vibrator.

A new pedestal vibrator of exceptional power.

The motor, which drives the flexible shaft, is fitted with a speed control, and the vibrating hand piece is fitted with a control to allow an adjustment of the amount of vibration. Thus, it is possible to have a variable speed of vibration and also a variable degree of vibration.

The general construction is robust, and on sound engineering lines.

The finish is well up to the high standard usually associated with apparatus of our manufacture.

The motor is finished in black enamel and nickle plate. The column supporting the motor is nickle plated and the base black enamelled.

Ball bearing rubber tyred castors permit the apparatus to be freely wheeled over any type of floor.

The ball hand piece is excellent for abdominal massage and there are 2 large rubber applicators included.

Please state voltage when ordering, and if the electrical supply is alternating current please state periodity.

Improved "Sanax" Vibrator.

The "Sanax" Vibrator is well known in the medical and massage profession, it is designed for real hard wear and can be thoroughly recommended.

The latest improvement is a switch, which permits two speeds, this is now fitted as standard to all instruments.

The carrying case is made of strong material covered with imitation leather and there are 6 applicators included.

"Eclipse" Portable Vibrator.

The "Eclipse" Vibrator has gained great popularity during the last six years, it is a light yet extremely powerful apparatus for vibratory massage.

The speed control which is fitted to all models permits a wide range of speed making the apparatus suitable for massage of the

most delicate part, or for deep heavy vibrations such as are required for abdominal massage.

The apparatus is universal, alternating or direct current and can be supplied to work from any voltage.
