Natural living – The Bioforce way.

Ecology-consciousness and healthy living are very much in vogue right now. Which is why it's reassuring to know that one company has been ardently proposing a better way of life since 1963.

Dr. H. C. Alfred Vogel has been active as a naturopathic physician for over 50 years. His formulations and knowledge are responsible for making Bioforce become one of the most important companies in the field of herbal extracts, homoeopathic medicines, speciality health foods and biological body care products.

The raw material for our products is cultivated using organic farming methods. None of the products are tested on animals. And they're all free from synthetic colours, flavourings and odours.

Try our world of natural nutrition. And discover better living – the Bioforce way.

Good for the World the World over

The spice of life
from nature's
seasonings.

Unfortunately, there are those who see health-conscious nutrition as dull and flavourless. When in fact with Bioforce the opposite is the truth. Because our range of seasonings add a variety of flavours to all your culinary adventures.

Plantaforce is prepared purely from organically grown herbs and vegetables, all based on a cultured yeast extract rich in vitamin B. Easy to digest, it is unsurpassed in quality or taste and can be used as either a stock or to make a delicious vegetable soup.

Herbamare's distinctive flavour is derived from its combination of fourteen fresh herbs and mineral rich sea salt and provides that extra excitement in meals. For a more spicy flavour try Trocomare, a similar seasoning but with the addition of red peppers. Both are ideal to liven up the simplest fare and have proven extremely popular on the dining table and in the kitchen.

Alpamare is a seasoning sauce suitable for use with meats, stews, soups and gravies as well as salad dressings, vegetable juices and omelettes. It contains soy sauce, water, spices and vegetable and sea-wrack extracts.

Herbaforce is a spicy spread which can just as readily be used to flavour soups, stews, salad dressings and so forth. It is made with a cultured yeast extract, soy sauce and herbs.

Bioforce Whey

Whey is a by product in the manufacture of butter and cheese. It is often described as 'milk serum', and plays a large part in the traditional 'folk' medicine of Switzerland and Germany. It has been used on the continent for many centuries. Indeed, during the 19th Century, wealthy society used to make the trip to Switzerland for the 'Swiss whey cure'.

Swiss Molkosan is concentrated liquid whey from Bioforce. It contains all the minerals found in fresh whey and can be used in salad dressings, diluted, or added to fruit and vegetable juices as a refreshing drink.

Breakfast

with Bioforce.

Start each day how you mean to go on; breakfast with Bioforce.

Muesli

For example, there's our excellent muesli, tasty with cow's, goat's or soya milk, yoghurt and fresh fruit, depending on taste.

Ideal for digestion, its balanced grains are organically grown to offer your body the full value of the vitamins and are sweetened with granulated dried grapes and lactose, rather than adding sugar.

The ingredients also include oats, wheat, whole grain rice flakes, barley flakes, almonds, chestnuts, apricots, millet, and durian (a tropical fruit).

Bambu

Our coffee alternative, Bambu, has been enjoyed in Europe for over 40 years and took 80% of the votes in a recent consumer test of alternative beverages.

It contains no caffeine and therefore is equally enjoyable at night-time as it won't disturb your sleep. Its ingredients of chicory, figs, wheat, barley and acorns make it a truly refreshing morning drink.

Teas

Our teas are very refreshing too, and like the Bambu are all caffeine-free. They are available in loose form only in order to preserve the flavour and aromatics.

They include our Alpine Blend Teas and Wild Rose Hip Tea, and lend their own distinctive flavour to Breakfast times.

From the simplicity of the soil . . .

Many of our naturally based products have been developed through the application of sophisticated nutrition philosophies; nature enhanced by natural science.

But some rely solely on the quality of pure natural ingredients and a little imagination.

Biocarrotin, for example is a pure concentrate of organically cultivated carrots. Each 220g jar contains the equivalent of 7.5 lb of fresh carrots, with all the goodness of naturally occurring vitamin A.

Similarly, Biorandin contains the equivalent of 7.5 lb of organically grown fresh beetroot. It contains the natural occurring vitamin B complex and a host of minerals.

Both Biocarrotin and Biorandin can be taken in the concentrated form, diluted in milk, water or fruit juice, or with your meals.

Our cold pressed wheat germ oil and wheat germ oil capsules both contain a high level of natural vitamin E in their most absorbable form. Wheat germ oil is particularly tasty when used in salad dressings.

... to the secrets of the beehive.

Our Royal Jelly, Blütenpollen and Vitaforce on the other hand offer the secret virtues of the beehive.

Royal Jelly is very much in vogue at the moment. This is not surprising, considering the large amount of vitamins, amino acids and trace elements it contains. Bioforce Royal Jelly is absolutely pure and natural, with no gelatine

capsules or fillers. It comes in a 10g glass jar.

Blütenpollen is a loose bee pollen of selected quality, fermented by the bees, thus retaining all its valuable properties. A highly active supplement containing necessary amino acids, enzymes, minerals and trace elements, it should be taken before meals.

Vitaforce is a completely natural food supplement made from a combination of fruit juices, malt, yeast and bee-pollen extract, sweetened with date pulp and honey. Unpasteurised, it retains all the nutritional benefits of its constituent ingredients.
