FOOD TECHNOLOGY

INVESTIGATIONS

Developing a new Food Product

Boots is pleased to introduce its second resource pack for schools – Food Technology Investigations, a follow-up to the popular and well-received Healthy Eating Investigations.

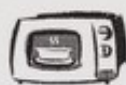

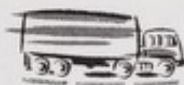

The pack is particularly flexible. Fifteen investigations track the development of a new food product, from research of the potential market to final production. They can be built up into an extended task for Key Stage 4 (14-16 years) of Design and Technology within the National Curriculum.

They can also be used as valuable individual investigations – many are mini-projects in themselves.

Students build the skills and values required with tasks like analysing market data, developing new recipes in practical sessions and reviewing factory layouts with the help of photographic slides.

More details overleaf.

FOOD TECHNOLOGY

INVESTIGATIONS

Developing a new Food Product

• Topics:

- Changes in the Food Market
- Food Ingredients and Food Additives
- Recipe Development and Pack Selection
- Food Labelling including Nutrition Labelling and Claims
- Food Production and Food Hygiene

- The Major project, Developing a New Food Product, has its own detailed brief.

• The pack contains these additional resources:

Recipe Cards, Comprehensive Work Cards on Surveys and Food Evaluations,
15 Factory Slides with Notes, Product Labels, Leaflets, Information Cards.

- A4 Format is used for Investigation, Work, Recipe and Information Cards for quick, easy photocopying. The pack comes in a ring binder and is easy to follow.

- Each Investigation has been developed by Home Economics teachers with the Boots Health and Nutrition Advice Centre. The pack has been endorsed by the Home Economics Advisory Teacher for Dudley.
