TRICITY BENDIX

Hot oven doors which burn children's hands despite meeting European Standards are regularly highlighted by consumer programmes.

We agree that the minimum touch-temperature level set by European Standards is too high – our Supercool® doors set the new standards!

.....
THE STANDARDS EXPLAINED

The European Standard allows a door temperature rise, above room temperature of 90°C. Hence the touch temperature with a 90°C (Door Temperature Rise) + 25°C (Room Temperature) = 115°C!

TEMPERATURE RISE		TOUCH TEMPERATURE
Current British Standard	+90°C	115°C
IEC proposed	+80°C	105°C
Consumer Association proposed	+65°C	90°C
TRICITY BENDIX Supercool®	+40°C	65°C
(Room Temperature)		25°C

BE CAREFUL BECAUSE MANY MANUFACTURERS QUOTE TEMPERATURE RISE AS THE "TEMPERATURE" OF THEIR DOORS. YOU SHOULD ADD 25°C TO GET THE ACTUAL TOUCH-TEMPERATURE.
