Our
fresh
taste
starts
here

Alta Dena® produces the freshest milk you'll ever taste. That's why our premium dairy products are the best you can buy. How do we do it?

Our farmers treat their cows just like family.

Alta Dena cows get nearly 500 square feet of personal space. It's kind of like each cow having her own condo.

Our farmers get up with the chickens every morning, and serve their cows a nutritious breakfast.

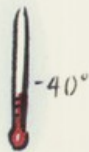

Alta Dena cows eat fresh green alfalfa hay, not just that dry stuff. They even have their own nutritionists. (But we draw the line at personal trainers.)

Our farmers do everything possible to keep their cows happy and healthy, so their milk will be the best. And we believe in doing things the natural way. So our farmers never give their cows bovine growth hormones to stimulate milk production as some other farmers do.

Then we deliver our milk within 24-48 hours of milking. We hope you'll enjoy the fresh taste of Alta Dena milk and all our delicious products every day.

We even keep our milk colder than required, to make sure it stays fresh.

And, to ensure a fresh taste, we never use powdered milk solids from outside sources as some other dairies do.

We test our milk 27 separate times to make sure it contains no harmful substances.

Pure.Wholesome.Good.

Alta Dena Certified Dairy knows you want only the very best for your family. So we do things a little bit differently than most dairies. We take special care, every step of the way, to bring you the most healthful, freshest tasting dairy products available.

We work with independent local farmers, so our milk is delivered fresh from the farm every day. And all our dairy products are made the natural way, with rigorous purity tests and no added hormones. We keep things extra clean, too - from the cows to the milk trucks. Higher standards mean higher quality. That's why Alta Dena Certified Dairy products have been the first choice of people just like you for over half a century.
