Peter A.H. Rivett Esq., M.D.,
Station Road Surgery,
CALNE,
Wilts.

FABAHISTIN[®]

(Mebhydrolin)

Antihistamine therapy
without sedation

gives prompt and persistent
relief in:

hay fever
vasomotor rhinitis
bronchial asthma
(of allergic origin)
urticaria
pruritus
drug rashes, etc.

"A series of tests showed that the sedative effect (drowsiness) experienced with a great many antihistamines, did not occur with Mebhydrolin. It appears therefore to be a suitable preparation for the treatment of those for whom car driving or machine operating is a necessary part of daily life. (1)."
