'Panopepton'

Presents Solids in Fluid Form.

'PANOPEPTON' presents the entire digestible solids of beef and wheat in a perfectly diffusible form.

These solids, of the highest nutritive value, are derived from the basic foods by physiological conversion; are immediately available for nutrition without drawing upon the patient's reserve of "energy" for digestion or metabolism.

The actual and potential benefits from 'Panopepton' are readily realised by the physician.
