Did You Know...

*A CONDOM CAN HOLD OVER
TWO BUCKETS OF WATER...*

*CAN HOLD OVER
40 LITRES OF AIR...*

*CAN STRETCH OVER
152 CENTIMETRES OR 5 FEET...*

AND IS STRONG BUT SENSITIVE...

Why not ask for more information about Condoms? They are one of the most natural forms of contraception and protection available, and when used properly condoms are as safe as the mini-pill. In these days of sexual equality women can take an active role in recommending them, carrying them and even help

putting them on. Condoms can be good fun because there are quite a few varieties to choose from. Why not try a different one each time you make love? But if you are not yet finally committed to one partner, then condoms are essential because they can offer the only barrier to AIDS and

other sexually transmitted diseases. You may believe that your first relationship will last for life. We wish you luck but unfortunately the facts will generally prove you wrong. When you are asking for condoms always ensure that they carry the B.S. 3704: 1989 Kitemark.

Mates will look after the Quality and leave Condomsense to You...
