# SAFER SEX IS A PACKAGE!

## **We all know that condoms are an important part of safer sex, but they aren't everything.**

If you are having sex there is a whole package of things you should do to reduce the risk from HIV.

- *Be prepared – think about what you are willing to do.*
- *Communicate – talk to your partner about what you want to do and what you don't want to do.*
- *Reduce your number of sexual partners.*
- *Try things other than penetration, look at our Sex Menu for ideas, or use your imagination!*
- *Use a condom properly – every time you have sex.*
