Talking about safer sex isn't always easy.
Drugs such as Alcohol, Cannabis, Ecstasy,
LSD, speed & cocaine can make it harder
to think clearly and take the safer
options. So, to prevent STDs, unplanned
pregnancy and HIV, practice safer
sex everytime; always use condoms
and a water based lubricant if
you're into penetration; and make
sure that you don't leave
the talking 'til last!

Take care
Be aware...
