If Your Man Is Dabbling In Drugs... He Could Be Dabbling With Your Life.

Shooting up or skin popping, if your man is sharing needles he could get the AIDS virus and bring it home to you. So if he's running with the drug crowd, even if it's only on the weekends, you need to talk to him. Try to get him into counselling. Insist that he wear a condom every time you have sex. And if he's not listening to you—do something to save your life. Leave.
