If You're Wondering Whether To Wait For Sex, Wait Till You Read This.

The only 100% sure protection against AIDS is no sex at all. So it's only smart to wait till you're older to have sex. And then it's safest to stay with one partner—who is also faithful to you—for a long time. And always, always use a condom.

Don't ever share needles for drugs, ear-piercing or tattoos, either. Stay safe, and you have an excellent chance of loving longer. For more information, call the AIDS Hotline in Northern California at 1-800-367-2437, or in Southern California at 1-800-922-2437.

AIDS.
It's Up To You.
