# Tell Your Kids About AIDS Now. Or Someone Else May Have To Later.

How can we protect our young people from AIDS? With information. Tell them frankly that the safest protection is to avoid sex altogether. If they do have sex, they can reduce their risk by using a latex condom with every partner, every time. And they must never share needles—for drugs, tattoos, or even pierced ears. For more information, call the AIDS hotline in Northern California at 1-800-367-2437, or in Southern California at 1-800-922-2437.
