OF ANIMAL BEINGS,

This **extraordinary Machine** which in the ungenial climate of England, realizes the **greatest wonder of Egypt**, both in the ancient and modern world, has already given existence to **Several Thousand chickens and other birds**; it stands upon a table, and animal life in its most perfect and healthful state is made to burst into existence in the presence of the visitors. It is capable of containing two thousand eggs, and of hatching about one hundred daily, or **Forty thousand** per annum!

The wonderful process of the development of organization as discoverable by the assistance of powerful instruments, and the no less striking and **interesting phenomena** that accompanies it, render this **Exhibition** one of the most **magnificent spectacles** of infinite power and wisdom which the human mind can contemplate, attractive alike to every class in society.
