### HIV & THE FIRST NATIONS COMMUNITY

The AIDS virus does not discriminate!  
HIV / AIDS is spreading among First Nations people. Among the general population the number of HIV cases is plateauing, while the rate of seroprevalence is on the raise in the First Nations community.

Remember, it does not matter if you are homosexual or heterosexual, female or male, Aboriginal or not - AIDS can affect all of us.

If you would like more information on HIV / AIDS, please drop by at *2-Spirited People of the 1st Nations* office.

THIS POSTER WAS MADE POSSIBLE BY FUNDING FROM  
THE ONTARIO MINISTRY OF HEALTH - AIDS BUREAU - 1993
