Si esta prueba es positiva,

hay otra que debe hacerse.

Nuevas investigaciones demuestran que si usted ha contraído VIH, hay tratamientos para reducir las oportunidades de que su bebé sea infectado por el mismo virus.

Usted debe saber cual es su condición en cuanto al VIH, tanto por usted como por su bebé. Recuerde, su bebé no tiene por qué contraer el VIH.

Para mayor información sobre el VIH y el embarazo, primero consulte a un médico. Para mayor información acerca de pruebas y consejo sobre SIDA/VIH, llame a la

1-800-AID-AIDS

Línea directa informativa del SIDA
del Departamento de Salud Pública de Illinois

TDD 1-800-782-0423

(para aquellos con impedimento auditivo solamente)

Línea Directa Informativa
sobre SIDA del
Departamento de Salud
Pública de Illinois al

Si está embarazada

o piensa quedar

embarazada,

necesita saber si tiene el

VIH, el virus que causa

el SIDA. Saber cual es

su condición en cuanto

al VIH pudiera salvar la

vida de su bebé.

If this test is positive,

there's another one you should take

New research shows that if you are HIV positive, there are treatments available to reduce the chances your baby will be infected with HIV.

You should know your HIV status, for both you and your baby. Remember, your baby doesn't have to get HIV.

To learn more about HIV and pregnancy, first ask a doctor. To find out about AIDS/HIV testing

and counseling near you, call the **Illinois Department of Public Health AIDS Information Hotline** at **1-800-AID-AIDS**, TDD (hearing impaired use only) **1-800-782-0423**.

If you're pregnant

or thinking about

getting pregnant,

you need to know if you

have HIV, the virus that

causes AIDS. Knowing

your HIV status can

save your baby's life.
