## CHILDREN AND AIDS

**Children are both infected and affected—  
a double tragedy**

- As of January 1994, 1 million children world wide were infected.
- If HIV continues to spread in the countries, there will be a great increase in deaths among infants and children.
- By the year 2000, 10 million children will be orphaned as their parents will die of AIDS.

**Infants and children infected and affected by  
HIV infection/AIDS need special love and attention.**
