Care For People with AIDS

PROTECT Your Patient From Infections
PROTECT Yourself and Others From AIDS

Wash Hands

Wash hands often especially after using latrines or toilets, changing soiled bedding and clothing and before handling your own or the patient's food.

Cover Wounds

Cover wounds especially on hands or places likely to touch the patient. Use clean cloth or plasters to cover wounds.

Keep Clean

Keep all bedclothes, towels, the patient's body and clothing clean. Especially clean away faeces, blood, vomit and sweat. Use bleach (JIK) on bedclothes or dry them in the sun and iron them.

Don't Share Sharp Things

Don't share razors, toothbrushing sticks, toothbrushes or any other things which can possibly draw blood or touch sores.
