Mr. Brookes's Celebrated Museum and Theatre of Anatomy.

MR. GEORGE ROBINS has the pleasure to announce to the Medical World, that he has been honoured by the instructions of Joshua Brookes, Esq. F.R.S. F.L.S. &c. &c. to SELL by AUCTION, on THURSDAY, the 3d of July, and 20 following days (Sunday and Monday always excepted,) at the Theatre of Anatomy, in Blenheim-street, London,

**THE ANATOMICAL AND ZOOLOGICAL MUSEUM OF THIS
LEARNED ANATOMIST.**

It includes every description of Anatomical Preparation calculated for the elucidation of all parts of the human body and its diseases, both dried and in spirits, with a multitude

OF PATHOLOGICAL SUBJECTS,

comprising Preparations, Illustrative of Morbid Anatomy, on a very extensive scale; Casts and Models of the Gravid Uterus, taken from individuals who have fallen victims either during or subsequent to Parturition, demonstrating almost every variety of presentation of the Fœtus, Twins, &c. Besides which, there is an extensive collection of Fœtuses and Casts of ditto, of every period of Utero Gestation, and every variety of mal-conformation; in fact this scientific Repertorium has acquired its justly extensive reputation from the well-known acumen displayed by its enlightened Founder. In addition, but forming the first part of the sale, the extensive and perfectly unique

COLLECTION OF ZOOTOMICAL SUBJECTS,

chiefly comprising the Skeletons of almost all the Mammalia and Birds, with many splendid Vascular Preparations of both classes of Animals, as well as some superb Skeletons of Reptiles and Fishes, injected specimens, &c.; a large display of the rarest Quadrupeds, Birds, Reptiles, and Fishes stuffed, with some Cases of Insects; and further, the Hippiatrist or Veterinary Surgeon will find a most interesting display of the Anatomy and Pathology of the Horse. The Museum comprehends

UPWARDS OF 3,000 PREPARATIONS,

in glasses, containing a choice selection of various parts of the human body, likewise a great assortment of deceased bones, in many of which the morbid affection is very remarkable. Amongst these, a cranium, brought from Lima, extensively afflicted with osteitis, is probably unique. Numerous and uncommonly fine illustrations of the ravages made by syphilis in the osseous structure of man, the dreadful results of which are seen in a fine series of crania, and in most other bones. There is one

INVALUABLE SPECIMEN OF THE LUXATION OF THE HEAD,

of the os femoris into the foramen thyroideum, and from the ligamentum obturans becoming ossified, it is formed into a concave receptacle for its alien tenant. The whole forming the finest exhibition that ever was presented to the attention, and for the admiration, of the medical world; one which, to the latest period, will reflect immortal honour on the zealous and highly gifted individual who, at an expence of 30,000l., and a sacrifice of 30 years of his life, has accomplished this Herculean task. The limit of an advertisement necessarily preclude going into a further detail, but descriptive Catalogues will be ready by the 20th of June, and then had at the principal towns in England, Scotland, and Ireland; at Paris and Berlin; and of Mr. Robins, Covent Garden, at 2s. 6d. each, without which no one can be admitted to this Exhibition.
