*The Family Favourite
at Every Meal*

Important Note. It should be distinctly understood that "Ovaltine" Rusks are **not** intended to replace "Ovaltine" Tonic Food Beverage. Users of this delicious beverage, which contains the best of Nature's foods—malt, milk, eggs and cocoa, will find the Rusks a delightful and nutritious adjunct in place of ordinary rusks, biscuits, etc. A cupful of "Ovaltine" Tonic Food Beverage with one or two "Ovaltine" Rusks, provide a satisfying and highly nourishing meal.

OVALTINE[®] RUSKS
for Infants, Growing Children & Adults

"OVALTINE" RUSKS

Appetising, Digestive and Nourishing.

"OVALTINE" Rusks have been introduced to meet the requests of a large number of medical men and users of "Ovaltine" Tonic Food Beverage, for a Rusk possessing a higher nutritive value than ordinary rusks or biscuits. The desired Rusk should be helpful to the infant when teething, improve the nourishment of the growing child, appeal with pleasure to the impaired appetite of the invalid or convalescent, and also be welcomed by adults in normal health as a valuable addition to the regular dietary in place of bread, toast, biscuits, etc.

"Ovaltine" Rusks fulfil these requirements in a completely satisfactory way. They are made from the finest wheaten flour, in which is incorporated a suitable proportion of delicious "Ovaltine" Tonic Food Beverage. As this well-known preparation consists of a highly concentrated extraction of ripe barley malt, rich creamy milk and fresh eggs, it will be appreciated that the nutritive value of the Rusks is greatly enhanced. "Ovaltine" Rusks are delightfully crisp, slightly sweet in flavour and are digested with ease.

Infants. When the period of dentition arrives and the small milk teeth make their appearance in the gums it is noticeable how baby endeavours to bite hard substances.

"Ovaltine" Rusks are a special help during this troublesome time and may be given when baby is about 9 months old. They break up readily in the mouth.

Price 1/6 & 2/6 per tin.

whilst giving just that assistance needed to bring the little teeth through the gums.

Growing Children. "Ovaltine" Rusks are most acceptable to children who are outgrowing their strength. They contain nutrient properties essential to growth, and promote strong bones and sound muscles.

Invalids and Convalescents. The digestive powers are naturally impaired, distaste exists for the usual sickroom dietary and variation is always eagerly welcomed. The choice crispness and appetising flavour of "Ovaltine" Rusks are always enjoyed in such cases. They do not cloy the palate and are easily digested.

For General Use at Mealtimes. "Ovaltine" Rusks are valuable alike to young and old, and are much to be preferred to toast or biscuits at mealtimes. Deliciously tempting with cheese, wine, fruit, or served with hot or cold milk, tea, coffee, etc.
