To combat nervousness and fatigue

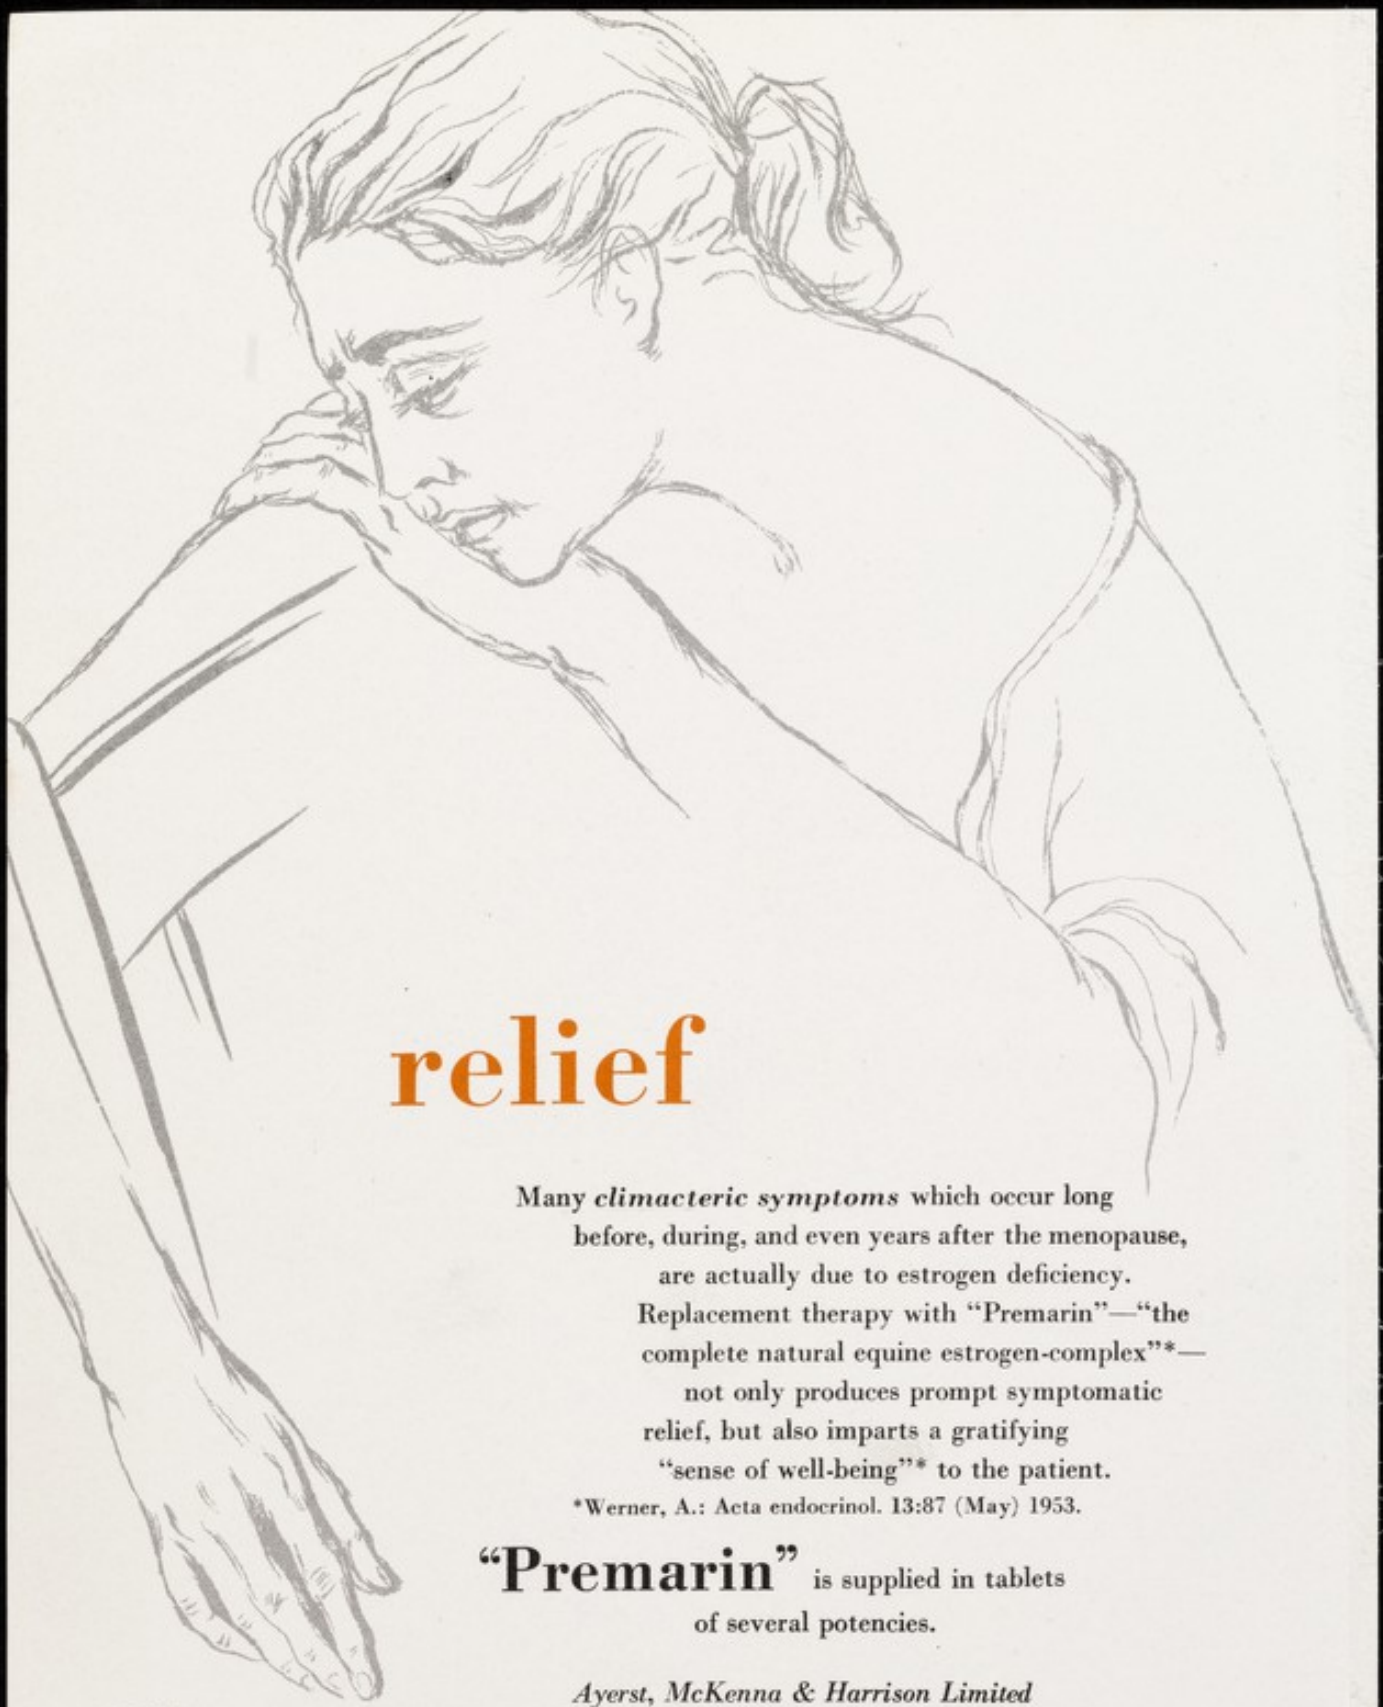

"Beminal" with Phenobarbital constitutes a direct approach to correcting the neurasthenic syndrome so typical of a deficiency of the B vitamins. The fatigue, insomnia, poor appetite, forgetfulness, and inability to concentrate respond quickly (and often dramatically) to therapy with "Beminal" with Phenobarbital.

"Beminal" *with*
phenobarbital
tablets and liquid

relief

Many *climacteric symptoms* which occur long before, during, and even years after the menopause, are actually due to estrogen deficiency. Replacement therapy with "Premarin"—"the complete natural equine estrogen-complex"*—not only produces prompt symptomatic relief, but also imparts a gratifying "sense of well-being"* to the patient.

*Werner, A.: Acta endocrinol. 13:87 (May) 1953.

"Premarin" is supplied in tablets of several potencies.
