A Home Remedy!

THE ELECTROPOISE.

IN curing or greatly alleviating actual disease, especially chronic cases of Rheumatism, Indigestion, Nervous Disorders, Neuralgia, Insomnia, Paralysis, Liver and Kidney troubles and the like, the **Electropoise** has won its way, succeeding often where all else has failed. But it is also an invaluable and unequalled tonic and builder up of a system generally run down without being afflicted with any special malady. You should have one if only for the promotion of sleep and the assimilation of food, for the benefit of the general health. No family should be without an **Electropoise**.

ORDINARY METHOD OF USE.

SIMPLE!—SAFE!—NOT A BATTERY!—NO SHOCK!

Any Intelligent Person can apply it.

The **Electropoise** achieves its remarkable results by its action on the blood current, causing an equal distribution throughout the body, relieving congestions and supplying those parts where the blood is deficient. It promotes the process of nutrition in every part of the body, gives life and vitality through the blood, causing the system to absorb an extra amount of nature's own great vitaliser—

PURE ATMOSPHERIC OXYGEN.

What Others Say.

What we say about the Electropoise is sustained by the experience of seven years, while those who have used it furnish us with the

MOST AMPLE TESTIMONIALS.

The Electropoise, judged by its results, is entitled to investigation at the hands of every invalid. It does not wear out nor lose its power; and any number of persons can use the same instrument, thus rendering it an all-round "Family Remedy." This is why we say it is cheap at any price.

After Months of Experience.

What an invalid wishes to know about a remedy is not only what it has done, but what it is doing now.

The REV. G. DUNCAN, D.D., has had for many months three Electropoises in use in connection with his health lectureship and pastorate at Gravesend. In one of his lectures last year, Dr. Duncan said, alluding to the Electropoise:—"The instrument is a great boon to all who suffer from every form of nervous disorders such as rheumatism, St. Vitus' dance, neuralgia, and prostration of all kinds. It proclaims war upon all the troubles which may have assailed the body, and through the blood it conquers them. I have had the instrument tried and tested in connection with this lectureship, and can only speak in the most assured terms of its efficacy. The most nervous, frail, and despondent patients can use it without discomfort, and no one can try it in vain. If I require a long and specially-refreshing sleep of seven or eight hours, I have but to use the 'Poise,' for two or three hours during the day, and the balmy sleep is mine. I have tried the 'Poise,' and I bear witness to its sterling worth."

Later, Dr. Duncan wrote as follows:—"My further observation of the use of this remarkable instrument has more than confirmed my expectations, based on what I have seen it do among the friends of my health lectureship. My services of the use of the instruments are entirely gratuitous. It is more than likely that I will have to get another, for I cannot at present cope with the demands made on those I have in use."

BRONCHIAL ASTHMA

of five years' standing is a severe test of the powers of any remedy.

6, Dudley Place, Paddington, April 25th, 1895.

Dear Madam,—I am writing to tell you of my latest experience with the Electropoise. You will remember my sad plight some eighteen months ago. Five years of Bronchial Asthma, and the unavailing efforts of eleven doctors, had left me a shadow, scarcely able to move about. As you know, the 'Poise gradually and surely restored my health, until I was almost my former self, and could walk down town, long distances, and go about as I had done before being ill. In fact, I thought I was so completely cured that I laid the 'Poise aside and almost forgot where I put it.

Well, I have had a relapse. Some months ago I caught cold, but paid no attention to it. Later, I caught cold afresh, and carelessly let that take care of itself, until I found it had brought back my old enemy. If I had only used the 'Poise at first, this attack would never have come on. Too late to avoid it, however, I got out my 'Poise and began the treatment, and I know you will be glad to hear that I have steadily improved, and am almost well again, in spite of the terrible weather. I will call and see you the first pleasant day.

Yours sincerely,

(Miss) B. TYRRELL.

ECZEMA, RHEUMATISM, SLEEPLESSNESS.

J. F. SHOREY,
Manufacturing Chemist.

67, Farringdon Road, London, June 27th, 1895.

Dear Mr. Cory,—I have arrived at a time of life (in my 70th year) when I have become troubled with a loss of vigour, accompanied by Eczema, Constipation, Rheumatism, and Sleeplessness. I have used the Electropoise for some time now, and have found a relief from all these disabilities, and can confidently recommend it to all persons thus afflicted.

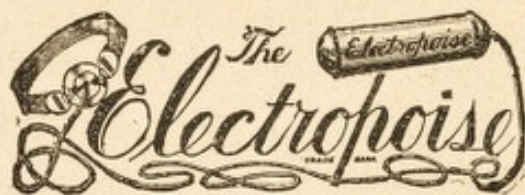

Yours kindly,

J. F. SHOREY.

BRIEF AND TO THE POINT.

The REV. R. GOVETT, M.A., Surrey Road, Norwich, procured an Electropoise on the recommendation of a friend, and on June 3rd last, said in a letter to him:—"Thank you for recommending the Electropoise. It is a great remedial power."

CURES WITHOUT MEDICINE.

PARALYSIS.—PHILIP SAYLE, LL.D., Tulse Hill :—“ I have the satisfaction of saying that my wife continues to use the Electropoise and with the improvement sustained.”

CONSTIPATION, HÆMORRHOIDS.—MISS E. LANDER, Brighton :—“ I can still speak well of the 'Poise as meeting all the ailments that I have tried it for, since purchasing it over two years ago.”

SORE THROAT, COLD.—MR. STAFFORD SMITH, of the Wilson-Barrett Co. :—“ After a few hours from the time I used the Electropoise I was another man, my voice came back to me and my cold had disappeared.”

LIVER.—COL. E. V. HITCH, 12, Duke Street, Great Portland Street :—“ I applied the Electropoise as an experiment and the attack promptly passed away. I am a convert to the power of the Electropoise.”

CHILDREN.—MRS. E. ROBERTS, Worthing :—“ When either of us is poorly in any way, or the children, we put the 'Poise on. We never have any medicine in the house now since we had our new doctor.”

LUMBAGO.—REV. J. M. MANGLES, Glossop :—“ I tried the Electropoise with most satisfactory results.”

NERVE RESTORER.—MRS. WINIFRED LIGHTFOOT, Upper Sydenham :—“ As a restorer of nerve force I cannot speak too highly of it.”

OVERWORK.—HENRY D. MOORE, Surgeon-Dentist, Frankfort-on-the-Main :—“ I have been using the 'Poise now for about a year, and although not using it for any special trouble I have found that in general health I am much better than I have been before, and have lost a disagreeable feeling of being run down all the time, in spite of my work being as trying as usual. I consider it now as a friend in fact.”

MUSCLES.—W. G. TIFFANY, Athletic Trainer, Paris :—“ It may be faith cure, but I think it well worth trying for people of advanced years who still wish to cling to athletics.”

SCIATICA, NEURALGIA.—S. C. PITTENGER, Cashier, New York Athletic Club :—“ I was advised by a friend to try the Electropoise, and its effects have been marvellous.”

BISHOP WM. TAYLOR, of Africa :—“ I have used the Electropoise with satisfactory results.”

H. W. VOEGELEIN, Superintendent of Missions of the Evangelical Association of Japan :—“ The Electropoise is far more than a substitute for medicine, besides the saving of doctors' bills.”

Price £2 2s.

If you wish to know more about the Electropoise before deciding to purchase an instrument, we shall be glad to send to any address

OUR ADDRESS :

ELECTROLIBRATION CO., 407, OXFORD STREET, LONDON.

Mr. Chappell Cory, Manager.

An Experienced Lady Manager meets all Ladies, and deals with their Correspondence.

INFLUENZA, RHEUMATISM, NEURALGIA.

27, Solon New Road, Clapham, S.W.

April 17, 1895.

Dear Sir,—For the last two or three weeks my wife, who is more conscientious than I am, has pestered me to perform what she considers an act of duty on my part. I therefore obey, although, I daresay, you have so many testimonials of the same kind that one more or less will not make much difference. I suffered some time since from Influenza, which left behind it an almost total loss of voice, which, in my profession, meant a total loss of income. To recover both voice and income I had the best medical advice, but nothing seemed to do me any good. My wife, who is always trying some "fad" or other, heard of someone who had been cured of something by your Electropoise. The result was that I did try the Electropoise, and in a few days had my voice again, and was as well as ever.

Having thus in my own person proved its efficacy, I lent it to an old lady 78 years of age, who tried it for Rheumatism, and with the best results. Then it was tried for Neuralgia, and again successful, and I am so pleased with its curative effect, that I believe it would cure almost anything.

Yours very faithfully,

THOS. WILLIAMS.

INFLUENZA, INDIGESTION, KIDNEY TROUBLES.

41, Acton Street, W.C.,

December 14th, 1895.

Dear Sir,—I have long been thinking I ought to give you my testimony as to the great benefit the Electropoise has been to me after all other means have failed. For about seven years I had not known what it was to feel well, and have spent pounds on medicine, patent and otherwise. About three years ago I had influenza which left me very weak, and then followed a train of other disorders, indigestion, liver and kidney complaints. I could eat scarcely anything, but that I felt pain from it. Having tried nearly every known remedy with little or no relief and having become so weak I could scarcely crawl about, I felt I must give up and had just said to my dear wife I felt that my work was done and it seemed no use to try any more.

She was of the same opinion, but in a day or two I saw in the *Christian Herald* the word "Electropoise," and, being new to me, I was induced to read on, and found it was recommended as a cure for nearly everything by a gentleman in America. I said to my wife, "I thought I had given up all hope, but I think I will call and see what it is like." The result was I got an Electropoise and began using it at once. The first day it made me light-headed and the fourth day I felt as if all the complaints were worse, but the next day I was better, and within a week I felt like a new man. No more crawling, I felt I could run, and began to enjoy my food, which I had not done for years, and now I feel I want my meals before the time. So I have cause to bless God, and to thank you for the kind attention you have given to my case. Wishing you the best of blessings,

I am, dear Sir, yours truly,

JAS. LUCAS.

NERVOUS PROSTRATION.

St. Margaret's, S.W., Middlesex,

April 4th, 1893.

Dear Miss Howard,—My conscience has for a long time accused me for not writing to thank you for your most valuable little Electropoise. I confess I was a great sceptic, but individual experience has proved how wrong I was to condemn what I now feel is the most valuable invention to suffering mortals. When first induced to try it I was suffering from low, nervous depression, unable to restrain tears whenever a kind word was spoken, anything pathetic read, or a sad case related. Now, entirely owing to this mysterious little Electropoise, my nerves are wonderfully restored. I am in perfect health, and feel quite bold again to face life's daily trials, and without the aid of medicine of any sort. Could people only be persuaded to try our little friend, I am sure the demand would soon exceed the supply. Wishing you more success than I know you are achieving, and with gratitude to the clever inventor!

Believe me, dear Miss Howard, very sincerely yours,

(Mrs.) FANNY S. CAVELL.
