WILLS'S CIGARETTES.

MICROSCOPE.

FAMOUS INVENTIONS

No. 13

**WILLS'S
CIGARETTES**

Microscope.

The Compound Microscope was first devised by a spectacle-maker of Middelburg about 1590, but it is only within the last 100 years that it has undergone any important alterations. Professor Amici, Ross, Abbe, Dr. Wollaston, and Sir David Brewster each made great discoveries and improvements, and to these and to Joseph Lister (father of the great Lord Lister) belongs the honour of bringing the Microscope to its present high state of efficiency.
